

Figures

2.1	Non-linear relationship between economic growth and inflation	32
3.1	Inflation targets announced in 1997	42
3.2	Intermediate targets: money supply	44
3.3	Intermediate targets: exchange rate	44
3.4	Inflation indicators, January 1995 to July 1998	48
4.1	Structure of net foreign assets by category of capital flows	61
4.2	Changes in the koruna exchange rate regime	62
4.3	Loss of competitiveness: the PPP indicator	63
4.4	Financial wealth: approximation of the structures	69
4.5	'Restrictive' scenarios	73
4.6	'Expansive' scenarios	74
4.7	Exogenous factors: policy versus external variables	75
5.1	Three-month interest rates: the Czech Republic, Germany and the USA	82
5.2	Dollar per koruna	83
5.3	Koruna per Deutschmark	84
5.4	Output gap	84
5.5	Official CPI and net inflation	85
5.6	Smoothed CPI inflation	86
5.7	Czech inflation differential with the USA	86
5.8	Actual and fitted reaction function	89
5.9	Recursive coefficients	90
5.10	Recursive residuals and break-point Chow tests	92
5.11	Forecasting performance after the adoption of inflation, post-December 1997	94
5.12	Recursive residuals and break-point Chow tests	96
5.13	Recursive coefficients	98
5.14	Phillips curve: out of sample forecasting performance	100
7.1	Development of official foreign exchange rates	148
8.1	Reserve money	159
8.2	Monetary aggregate M1	160
8.3	Broad money velocity	160
8.4	Structure of M2	161
8.5	The money multiplier and its components	163

8.6	Domestic credit dynamics in real terms	165
8.7	Structure of domestic credit	165
8.8	Nominal monthly interest rates	166
8.9	Real monthly interest rates	167
8.10	Deposit and interbank interest rates	175
8.11	Currency to broad money and deposit ratios	176
8.12	Real money market volumes and average maturity of government securities	179
9.1	GDP growth rate in Poland, 1992–1997	185
9.2	CPI in Poland, 1992–1997	186
9.3	Unemployment rate in Poland, 1992–1997	186
9.4	Gross official reserves	191
9.5	PLN/USD exchange rate deviations from central parity	193
9.6	General government surplus/deficit in EU countries and Poland, 1996–1997	196
11.1	Relationship between volatility and net benefits	232
11.2	Total net benefits of joining the single European currency	233
11.3	Total net costs of joining the single European currency	233
11.4	Interaction between domestic economic volatility and decision to join EMU	234
11.5	GDP at constant prices, 1990–2000	239
11.6	Consumer price inflation, 1990–2000	241
11.7	Real interest rate, 1990–2000	243
11.8	Exchange rate behaviour, 1989:Q1 to 1998:Q1	245
12.1	Real interest rates and economic growth rates in 85 developing countries, 1971–1995	263
17.1	Stock market indices	377
17.2	Daily returns	377
17.3	Four-week differences	379
19.1	Ratio of bank deposits of non-financial agents to GDP, 1993 and 1996	421
19.2	Ratio of bank loans of non-financial agents to GDP, 1993 and 1996	422
