**James H. Alleman** is a Visiting Associate Professor in the Media, Communications and Entertainment Program at Columbia Business School, and Director of Research, Columbia Institute for Tele-Information, New York and Associate Professor for the Interdisciplinary Telecommunications Program at the University of Colorado, USA. Dr Alleman founded Paragon Service International – a telecommunications call-back firm. He has been granted patents on the call-back process widely used by the industry.

**Cristiano Antonelli** is Chair and Professor of Economics at the University of Torino, Torino, Italy. He is Vice-President of the International Schumpeter Society, Managing Editor of *Economics of Innovation and New Technology*, Associate Editor of *Information Economics and Policy* and Co-editor of the Kluwer series *Economics of Science, Technology and Innovation*. His recent findings are contained in *The Microeconomics of Technological Systems* (Oxford University Press, 2001). He has authored papers on the economics of innovation published in *Economics of Innovation and New Technology*, *Industrial and Corporate Change*, *Information Economics and Policy*, the *International Journal of Industrial Organization*, the *Journal of Economic Behavior and Organization*, the *Journal of Evolutionary Economics* and *Manchester School*.

**Vinton G. Cerf** is Senior Vice-President of Internet Architecture and Technology for WorldCom, Washington, DC, USA. Widely known as a 'Father of the Internet', Cerf is the co-designer of the TCP/IP protocols and the architecture of the Internet. In December 1997, Cerf received the US National Medal of Technology. He serves as Chairman of the board of the Internet Corporation for Assigned Names and Numbers and was Founding President of the Internet Society from 1992 to 1995. Cerf is a member of the US Presidential Information Technology Advisory Committee. Cerf sits on the Board of Directors for Nuance Corporation, Avanex Corporation and CoSine Corporation. Cerf is a Fellow of the IEEE, the ACM, the American Association for the Advancement of Science, the American Academy of Arts and Sciences, the Computer History Museum and the National Academy of Engineering. Cerf holds a BSc in Mathematics from Stanford University and an MSc and a PhD in Computer Science from UCLA.

**Kevin T. Duffy-Deno** is a Senior Director at TNS Telecoms, a subsidiary of Taylor Nelson Sofres, in Horsham, USA. Dr. Duffy-Deno's expertise is quantitative analysis. His recent efforts have focused on the analysis of telecommunications cost models and on the development of residential and business models of telecommunications demand, with particular interest in demand models for broadband access to the Internet and for bandwidth access capacity. Prior to joining TNST, Dr Duffy-Deno was an economist with the Utah Division of Public Utilities and the Utah Energy Office, and served on the faculties of various universities. His professional papers have appeared in *Information Economics and Policy*, the *Journal of Regional Science*, the *Southern Economic Journal*, the *Journal of Urban Economics*, *Energy Economics*, and *Resource and Energy Economics*.

**Scott C. Forbes** is a Senior Technology Auditor at Nextel Communications, USA, where he develops risk assessments for the company's wireless telecommunications networks and mobile commerce strategies. He has been a consultant to the FCC, private telecommunications and media companies, and non-profit organizations on policy issues related to telecommunications access and online privacy. He is a Fellow of Pennsylvania State University's Institute for Information Policy. He has authored papers and presented on topics such as universal service and information security. Forbes holds a PhD in Telecommunications from Pennsylvania State University.

**Robert M. Frieden** serves as Professor of Telecommunications at Pennsylvania State University, USA. In addition to his teaching and research duties, Professor Frieden provides corporate training, legal counsel and consulting services in such diverse fields as personal and mobile communications, facilities interconnection, satellites and privatization. He has authored articles and books, including comprehensive primers on international telecommunications, cable and satellite television and communications law. His most recent book is entitled *Managing Internet-driven Change in International Telecommunications* (Artech, 2001). Professor Frieden is a graduate of the University of Virginia School of Law (JD 1980) and the University of Pennsylvania (BA 1977) (with distinction).

**Steven Globerman** is Kaiser Professor of International Business and Director of the Center for International Business at Western Washington University, Bellingham, USA. His research activities have covered a range of issues in industrial economics and international business. He has held permanent and visiting faculty positions at universities in North America and Europe and has consulted for public and private sector organizations.

**Harald Gruber** is Senior Economist responsible for economic analysis of the telecommunications sector at the Projects Directorate of the European

Investment Bank in Luxembourg. He also teaches at the University of Siena. His special interest is mobile telecommunications on which he recently published articles in the *European Economic Review*, *Telecommunications Policy*, *Information Economics and Policy* and the *International Journal of Industrial Organisation*. Previously he has researched the semiconductor industry, publishing articles and a book entitled *Learning and Strategic Product Innovation: Theory and Evidence for the Semiconductor Industry* (North-Holland).

**Jerry A. Hausman** is the John and Jennie S. MacDonald Professor of Economics at Massachusetts Institute of Technology, Cambridge, Massachusetts, USA. He is Director of the MIT Telecommunications Economics Research Program. Professor Hausman teaches a course on 'Competition in Telecommunications' to graduate students in economics and business. Professor Hausman received the John Bates Clark Award from the American Economics Association in 1985 for the most outstanding contributions to economics by an economist under 40 years of age. He also received the Frisch Medal from the Econometric Society. Professor Hausman has researched in telecommunications since 1974. He has served as a consultant for telecommunications firms and advised regulatory agencies in the US, the UK, Canada, Mexico, Sweden, Spain, Australia and Hong Kong.

**Donald J. Kridel** has been an Associate Professor of Economics at the University of Missouri at St Louis, USA since 1993. His primary teaching responsibilities are applied econometrics, forecasting and telecommunications economics. Earlier, Dr Kridel was the Director of Strategic Marketing at Southwestern Bell Corporation (now SBC Communications). He earned his PhD in Economics from the University of Arizona. Kridel has been active in telecommunications demand analysis and pricing research for 20 years.

**Michael D. Pelcovits** is Vice President and Chief Economist at WorldCom, Washington, DC, USA, where he is responsible for analysis and advocacy on domestic and international economic issues before government agencies, legislative bodies and courts. He joined MCI (which later merged with WorldCom) in 1988. Earlier, Dr Pelcovits was a Principal of the Washington, DC consulting firm of Cornell, Pelcovits and Brenner. Before entering the consulting practice Dr Pelcovits served as a Senior Economist at the FCC, and prior to that he was an Assistant Professor of Economics at the University of Maryland, College Park. Dr Pelcovits graduated *summa cum laude* from the University of Rochester in 1972 and received his PhD in Economics from MIT in 1976, where he was a National Science Foundation Fellow.

**Joseph N. Pelton** is Deputy Director of the Institute for Applied Space Research at George Washington University, Washington, DC, USA. Dr Pelton is also the Executive Director of the Arthur C. Clarke Institute for Telecommunications and Information that undertakes collaborative research with institutes in Europe, North America and Asia. He has served as Chairman and Dean of the International Space University of Strasbourg, Director of the Interdisciplinary Telecommunications Program at the University of Colorado at Boulder and Director of Strategic Policy for the Intelsat global satellite system. Dr Pelton has authored books including the Pulitzer Prize nominated *Global Talk*. He is elected to the Hall of Fame of the Society of Satellite Professionals and is a Full Member of the International Academy of Astronautics.

**Paul N. Rappoport** is an Associate Professor of Economics in the Department of Economics at Temple University, Philadelphia, USA. He is the founder and former Chairman of PNR and Associates. He is also a Senior Academic Fellow in Temple's E-Commerce Institute. His current research interests include modelling business demand for bandwidth, measuring Internet transactions, developing Internet metrics and e-commerce benchmarks.

**Jorge Reina Schement** is Professor and Co-Director of the Institute for Information Policy in the College of Communications and the School of Information Science and Technology at Pennsylvania State University, USA. He holds a PhD from the Institute for Communication Research at Stanford University. His recent books include *Global Networks* (1999), *Tendencies and Tensions of the Information Age* (1995) and *Between Communication and Information* (1993). His research focuses on the policy consequences of the production and consumption of information. In 1994 he served as Director of the FCC's Information Policy Project that recognized the Digital Divide. He introduced universal service as an evolving concept. He is chairman of the TPRC and is a board member of the Media Access Project, Libraries for the Future and the Benton Foundation.

**Timothy J. Tardiff** is a Vice President in the Cambridge office of National Economic Research Associates, Massachusetts, USA. He received a BSc in Mathematics from Caltech and a PhD in Social Science from the University of California, Irvine. At NERA since 1984, he evaluates pricing policies for competitive telecommunications markets, including incentive regulation plans and prices for access services to competitors, studies actual and potential demand for telecommunications services and develops approaches for measuring incremental costs of telecommunications services.

**Lester D. Taylor** is Professor of Economics and Professor of Agricultural and Natural Resource Economics at the University of Arizona, Tuscon, USA. He has a PhD in Economics from Harvard, and taught at Harvard and the University of Michigan before moving to Arizona in 1972. For the past 25 years, his published research has focused heavily on the telecommunications industry. His most recent book in telecommunications, *Telecommunications Demand in Theory and Practice*, was published in 1994.

**Tommaso M. Valletti** is Lecturer in Economics at Imperial College Management School, London, UK, and at the Politecnico di Torino, Italy. He is also a research affiliate of the Centre for Economic Policy Research in London. He has previously held teaching positions at the London School of Economics, where he obtained his PhD in Economics. His research interests focus on industrial economics, regulation and economics of telecommunications. He has published articles in *Information Economics and Policy*, the *Journal of Regulatory Economics*, *Regional Science and Urban Economics* and the *Review of Industrial Organization*.

**Michael R. Ward** is an Associate Professor of Consumer Economics at the University of Illinois at Urbana-Champaign, USA. He earned his PhD in Economics from the University of Chicago in 1993. He served as a Staff Economist at the Federal Trade Commission from 1991 to 1995, when he came to the University of Illinois. His research focuses on competition and market imperfections in high technology industries, especially the telecommunications industry. Of particular interest are the effects of imperfect information on consumers' online choices, consumers' use of information on the Internet, market institutions that have developed on the Internet to facilitate information transfer and the market consequences of consumer information gathering.
