1. Corporate and regulatory strategy for the new network century	1
<i>Eli M. Noam</i>	
The challenge of change	1
Strategies for telecommunications companies	3
Future of regulation in the network of networks	7
Impacts of new global telecommunications on traditional regulation	9
Conclusion	11

PART 1 FROM TELECOMMUNICATIONS REFORM TO INFORMATION SOCIAL POLICY

2. Evolution of the telecommunications industry	15
<i>Martin Fransman</i>	
Introduction	15
The telecommunications industry and the economics of industrial change	15
The telecommunications industry to the mid-1980s	16
The technological regime in the old telecommunications industry	18
Learning regime of the old telecommunications industry	19
The telecommunications industry in transition	20
Early entrants	20
Entrants and technology suppliers	20
The new telecommunications industry from the early 1990s	21
Late entrants	21
Technological regime in the new telecommunications industry	22
The changing location of R&D in the new telecommunications industry	22
Learning regime in the new telecommunications industry	24

Learning by network operators	24
New operators as F4 firms	25
Differentiation dilemma	26
The role of financial markets	26
Inventing the value of telecommunications company shares	27
The Internet paradigm and the info-communications industry	28
Emergence of the Internet	28
Birth of the info-communications industry	31
Technological and learning regimes in the info-communications industry	33
Mobile communications	33
Forces of competition	35
Conclusion	36
3. Preparing the information infrastructure for the network economy	39
<i>William H. Melody</i>	
Introduction	39
Stages of institutional reform	40
Telecommunications network development	43
Network access and service growth	43
Competition in basic telecommunications markets	46
Competition in mobile telephone service markets	50
Information infrastructure development	52
Network investment and capacity	52
(i) National network investment trends	53
(ii) International network capacity	53
Internet development	55
Higher speed network access options	56
(i) ISDN	60
(ii) DSL	61
(iii) Cable modems	61
Summary	61
Conclusion	65
4. Telecommunications policy research in information society discourse	68
<i>Erik Bohlin</i>	
Introduction	68
An overview of telecommunications policy	69
General considerations	69
Telecommunications policy research in the triad	69

Convergence and its effects on telecommunications policy	71
Stability of telecommunications policy despite convergence	71
Wider policy goals and the relevance of telecommunications policy	72
Future research needs	73
International outlook	73
Competence goals	73
An example	74
Justification	74
Problem overview	74
Outlook for research	75
Conclusions	76

PART 2 CORPORATE EXPERIENCE AND VISIONS

5. Formation and development of international alliances	81
<i>Peter Curwen</i>	
Introduction	81
Alliances in vogue	82
Protection of domestic markets and increased global market power	82
Access to overseas markets characterized by barriers to entry	82
Make available to domestic markets otherwise missing services	82
Shared infrastructure investment costs	83
First-mover advantage	83
Global alliances	84
Concert	84
Global One	86
AT&T-Unisource	88
Alliances must evolve or die	90
Conclusions	92
6. BT corporate experience and visions, 1990–2000	97
<i>Niall Levine, Douglas Pitt and David Lal</i>	
Introduction	97
BT in the 1990s: background and strategy	97
Path to the BT of 2000	98
Regulatory constraints on BT since the 1980s	99
BT's response to regulatory constraint	100
BT and the management of change	100
1984 to 1987	102
1988 to 1993	102

1994 to 1996	102
1997 to the present	103
Catalysts for change	103
1991 duopoly review	103
BT's changing organizational structure and culture	105
Organizational culture	107
Relationship with regulators	109
Impact of regulation on competition	110
Impact of regulation on consumers	111
Britain on-line	111
Conclusion	112
7. The evolution of US WEST and MediaOne	117
<i>Martin G. Taschdjian</i>	
Introduction	117
The late 1980s and the US WEST entry into international markets	117
Getting started	118
Domestic ramifications	122
Developments in Hong Kong	124
In the USSR	125
Speaking with 'one voice'	129
Australia and the Optus Vision experience	130
MediaOne in Georgia	132
Breaking up US WEST	134
Lessons learned	134
The future	135
8. Sprint – GTE's lost opportunity	137
<i>James H. Alleman and Lawrence Cole</i>	
Introduction	137
Telecommunications environment	138
Industry regulation and deregulation	138
GTE	138
SPC	138
United	139
Evaluation and critique of GTE's acquisition of SPC	140
Access charges	140
Anticipation of consent decree	143
Commoditization of long-distance service	145
Management ability	145
Valuation of SPC	145

Postscript	147
Conclusions	147
PART 3 INTERNATIONAL COOPERATION AND COORDINATION	
9. The European Union and world telecommunications markets	153
<i>Richard Cawley</i>	
Introduction	153
Telecommunications and the EU	154
Some history, politics and economics: 1987 – the beginning of the end	155
1994 – breakthrough at last	156
1998 – full competition and ongoing regulatory implementation	160
2000 – the end of the beginning, the new framework	165
Conclusions	168
10. The FCC and policy federalism: broadband Internet access regulation	173
<i>Timothy Brennan</i>	
Introduction	173
Broadband Internet services	175
Definition	175
Technologies	176
Penetration	177
Local governments versus the federal government	178
Local broadband cable controversies	178
Vigilant restraint: the FCC response	180
The DSL situation	181
Federalism controversies in competition policy	181
Antitrust	182
Electricity	182
Telecommunications	183
A note on the policy	185
Pro-open access	185
Does cable have a monopoly over broadband?	186
Vertical separation without regulation is unlikely to help	186
Lemley and Lessig	187
The consumer-locality analogy	188
Why trust individuals over central planners? The economic case	188
Implications for deference to local decision making	189
Non-economic policy goals	190

Analyzing local authority over cable access	191
Information and scale economies	191
Export of inefficiency	192
Universal service	192
Relative corruptibility	194
Concluding caveat	194
11. International telecommunication regulation: a trophy or atrophy	200
<i>Tim Kelly</i>	
International telecommunications: a trophy?	200
ITRs: atrophy?	200
Implications of WTO agreement on basic telecommunications	202
Economic context of ITRs	203
Competition policy and ITRs	204
Individual provisions of ITRs	205
Preamble	205
Article 1: Purpose and scope of the regulations	205
(i) Mutual agreement between administrations	205
(ii) Right of Member States to authorize the providing of an international telecommunications service to the public	206
Article 2: Definitions	206
Article 3: International network	207
(i) Cooperation to ensure quality of service	207
(ii) Provision of sufficient capacity	208
(iii) Mutually agreed routing	209
(iv) Right to use the network	211
Article 4: International telecommunications service	211
(i) Extending access	212
(ii) Cooperation in service provision	212
(iii) Minimum quality of service	213
Article 5: Safety of life and priority of telecommunications	214
Article 6: Charging and accounting	214
(i) Collection charges	215
(ii) Accounting rates	216
(iii) Monetary unit	217
(iv) Establishment of accounts and settlement of balances of account	217
Article 7: Suspension of services	217
Article 8: Dissemination of information	218
Article 9: Special arrangements	219

Article 10: Final provisions	222
What happens next?	223
12. The OECD and the internationalization of telecommunications	226
<i>Dimitri Ypsilanti</i>	
Introduction	226
Gradual liberalization	228
General Agreement on Trade in Services	229
International cooperation and coordination	230
The dangers of international multi-level governance	232
Policy convergence	234
Conclusions	238
13. International efforts to bridge the digital divide: a global imperative	241
<i>Bruno Lanvin</i>	
Introduction	241
Famous mistakes not to be repeated	242
Information, technology, development and the globalization backlash	242
How developing countries can benefit	244
How development agencies can use ICT	245
The globalization backlash	246
From words to action – a role for the G-8	246
What is the DOT Force?	247
Possible areas for action	247
Conclusion	249
14. World Bank telecommunication sector activity: the 1990s and beyond	250
<i>Charles Kenny</i>	
Introduction	250
Early history	251
The early 1990s	252
Need for a new strategy at the decade's end	256
Challenges and a new agenda	257
New policy focus	260
New investment focus	262
Conclusion	264

15. Telecommunications in the multi-lateral trading system	266
<i>Claude E. Barfield and Steven Anderson</i>	
Introduction	266
Telecommunications and the WTO	271
Scope of commitments in the agreement	272
Market access	272
Foreign investment	273
Satellite service	273
Most favored nation	273
Reference paper	275
Shortcomings and future negotiation	276
PART 4 REGIONAL DEVELOPMENTS	
16. Regulation of Internet services in North Africa	281
<i>Andrea L. Kavanaugh</i>	
Introduction	281
An authoritarian model of the press for the Internet	282
Regulation of the Internet	283
Oversight by committee	285
Access to computer network services	286
Tunisia	287
Morocco	288
Algeria	290
Liberalization of the market for new media	292
Data and TV communications via satellite regionally	294
Conclusions	296
17. Organizational change in Australasian telecommunications companies	300
<i>Mark A. Shadur, Kellie Caught and René Kienzle</i>	
Introduction	300
Overview of Australasian telecommunications companies	301
Telstra	301
Cable & Wireless Optus	301
Telecom New Zealand	302
Clear Communications	302
Regulatory framework	303
Australian telecommunications regulation	303
New Zealand telecommunications regulation	304
Models of organizational transformation	305

Organizational transformation in Australasian telecommunications companies	308
Organizational design	308
Work organization	310
Employee involvement	311
Strategic human resource management	312
Conclusions	314
18. Brazilian telecommunications: experience and future perspectives	319
<i>Marcelo Resende</i>	
Introduction	319
Brazilian telecommunications prior to privatization	320
Telebrás and the transition to a privatized system	329
An alternative scenario	331
Tariffs, competition and interconnection	338
Competition	338
Tariffs	340
Interconnection	341
Final comments	341
19. China leaps into the millennium	346
<i>Meheroo Jussawalla</i>	
Introduction	346
A global player in the information revolution	346
Conflict of priorities	348
Overview of the telecommunications sector	349
The Chinese wireless revolution	350
Internet explosion and e-commerce	351
China's digital divide	354
The Chinese space industry	356
Chinese entry into the WTO	357
Conclusion and prognosis	358
20. Regulation of French telecommunications and electricity markets	361
<i>Nicolas Curien and Dominique Bureau</i>	
Introduction	361
New market organization	361
Telecommunications	364
Electricity	370
Regulating utility markets	371

Legitimacy and powers of regulators	372
Public service obligations	375
The state as shareholder	380
Conclusion	381
21. Sector-specific regulation of German telecommunications	383
<i>Günter Knieps</i>	
Introduction	383
From legal monopoly to global entry deregulation	384
Global legal entry barriers	384
Partial entry deregulation	385
Global entry deregulation	385
Entry deregulation and the European context	386
Open network provision in partially entry-deregulated markets	387
ONP in globally entry-deregulated markets	388
Sector-specific market power regulation and general competition law	388
Asymmetric market power regulation due to hysteresis	388
EU asymmetric market power regulation	390
Phasing out German sector-specific market power regulation	391
Review of the German Monopoly Commission	391
Regulatory approaches outside Germany	392
The 1999 EU review	392
The disaggregated regulatory approach	393
Competition in long-distance telecommunications markets	395
Local loop the remaining regulatory problem	396
Conclusions	396
22. Challenges for Indian telecommunications: the 1990s and beyond	400
<i>T.H. Chowdary</i>	
State monopoly over telecommunications	400
Social objectives	401
Beginning of the end of monopoly manufacture	402
Deregulation of the networks and service markets	406
Regulation	408
Further liberalization and restructuring	409
23. Making markets: telecommunications in Western Europe	413
<i>Willem Hulsink and Andrew Davies</i>	
Introduction	413
Established national monopoly systems	415

<i>Contents</i>	xv
National environments and globalization	417
Anglo-American liberalism	418
Continental European mercantilism	418
Innovation and internationalization strategy	420
Domestic protection without internationalization	421
Domestic rivalry and internationalization first-mover strategy	422
National champions and internationalization catch-up strategy	423
European telecommunications: unity in diversity?	425
Conclusion	426
<i>Index</i>	431
