Contributors

**Philip Arestis** is Professor of Economics at South Bank University, London. He has also taught at the University of Surrey, Cambridge University (Department of Extra-Mural Studies), Greenwich University (where he was Head of Economics Division), and the University of East London (as Head of Department of Economics and Research Professor). He is currently Senior Research Fellow at the Levy Institute, New York City, USA. He has published numerous chapters in books, edited books and authored or co-authored books, ranging from *Introducing Macroeconomic Modelling: An Econometric Study of the United Kingdom* (Macmillan, 1982) to *Money, Pricing Distribution and Economic Integration* (Macmillan, 1997). He has also published extensively in academic journals.

**Riccardo Bellofiore** is Professor of Economics at the University of Bergamo, Italy, where he teaches monetary economics, macroeconomics and history of economic thought. In English, he has edited *Marxian Economics: A Re-appraisal* (Macmillan, 1998) and *Global Money, Capital Restructuring and the Changing Patterns of Labour* (Edward Elgar, 1999), and has contributed to *John Maynard Keynes: Language and Method*, edited by A. Marzola and F. Silva (Edward Elgar, 1994). He has published in academic journals on Marxian value and monetary theory, the monetary aspects of the Schumpeterian system, Wicksell’s and Keynes’s circuit theory of money, Mises and Hayek on banking and the cycle, Sraffian price theory and economic epistemology.

**Victoria Chick** is Professor of Economics at University College London. She has held visiting posts at the Reserve Bank of Australia, McGill University and the Universities of Southampton, Aarhus, Louvain, Torino, Catania, Burgundy (Dijon) and California at Berkeley and at Santa Cruz. She has published five books: *The Theory of Monetary Policy* (1973 and 1977; Italian translation); *Macroeconomics after Keynes: A Reconsideration of The General Theory* (1983; four translations); *On Money, Method and Keynes: Selected Essays of Victoria Chick* (edited by P. Arestis and S.C. Dow; Macmillan, 1992); *Recent Developments in Post-Keynesian Economics* (editor, with P. Arestis, Edward Elgar, 1992); *Finance, Development and Structural Change* (editor, with P. Arestis, Edward Elgar, 1995), and articles on monetary theory and policy, methodology and the economics of Keynes. She has served on the
Contributors

Council and Executive Committee of the Royal Economic Society and on the editorial boards of several journals. She is a member of the governing bodies of UCL and the University of London.

Richard H. Day is Professor of Economics at the University of Southern California, having joined the faculty in 1976. His early work involved the development of a class of empirically implementable recursive programming models. He subsequently contributed to dynamic microeconomic theory in which agents learn and economize adaptively out of equilibrium. In collaboration with Jess Benhabib, Wayne Shafer and Giulio Pianigiani, he demonstrated how chaos and ergodic statistical behaviour arise generically in virtually all economic processes in which nonlinearities are present. This work culminated with the two-volume study, *Complex Economic Dynamics*, published by The MIT Press (1994, 2000). Day is cofounder with Sidney Winter and editor of the *Journal of Economic Behavior and Organization*.

Ester Fano is Associate Professor of Economic History at the Dipartimento di Scienze Economiche, Universita di Roma I (La Sapienza). She has written about the industrial and agrarian policies of Italian Fascism, the political economy of the New Deal and the transformations of US labour markets in the 1960s and 1970s. Her more recent area of interest is the problem of technological unemployment during the Great Depression in the United States. Among her latest publications: ‘A “Wastage of Men”: Technological Progress and Unemployment in the United States’ (*Technology and Culture*, vol. 32, no. 2); ‘Devoti, eretici e critici del progresso’ – introductory essay to *La questione tecnologica* (Turin, 1993, papers collected by David F. Noble); ‘Ingegneri e Profeti: l’antifascismo dei grandi economisti critici: W. Beveridge, M. Kalecki, J.M. Keynes, E. Lederer’ in F. De Felice (ed.), *Antifascismi e Resistenze* (Rome, 1998), a survey of the economic ideas of the leading economists concerned with the struggle against Fascism.

Piero Ferri is Professor of Economics at the University of Bergamo, Italy, where he served as a Rector for 15 years. A D.Phil. at the University of Oxford under the supervision of John Hicks, he is an expert on macroeconomics and the labour market. He has published articles on these subjects in both international journals and books, among them *Wages, Regime Switching and Cycles* (Springer-Verlag, 1992) with E. Greenberg. Personal friend of Hyman Minsky, he has co-authored with him and with members of Washington University. He has also edited books on international aspects (such as the North–South problems and the European Union) for Macmillan and North Holland.

Duncan K. Foley is Leo Model Professor of Economics at the Graduate Faculty of New School University in New York City. He is co-editor of the
Contributors

Steve Keen is Senior Lecturer in Economics and Finance at the University of Western Sydney Macarthur, where he teaches finance, macroeconomics, economic dynamics and the history of economic thought. He has recently co-edited Commerce, Complexity and Evolution (Cambridge University Press, 2000). He is author of Debunking Economics, to be published this year for Zed Books, and Finance and Economic Breakdown, for Edward Elgar. He has published in academic journals on the development of Marx’s theory of value, mathematical models of debt deflation and financial instability, multisectoral dynamics in Kaleckian/Sraffian economics, and problems in Soviet models of economic growth.

J.A. Kregel is Professor in the Department of Economics of the Università degli Studi di Bologna and Adjunct Professor of International Economics in the Johns Hopkins University Paul Nitze School of Advanced International Studies, where he has also served as Associate Director of its Bologna Center from 1987 to 1990. He is currently serving as High Level Expert in International Finance and Macroeconomics in the New York Liaison Office of the United Nations Conference on Trade and Development.

Perry Mehrling is Associate Professor of Economics at Barnard College, Columbia University in New York City, USA, where he teaches monetary and financial economics. His main book is The Money Interest and The Public Interest, American Monetary Thought 1920–1970 (Harvard University Press, 1997). He has published work on the foundations and history of monetary economics in journals of economic theory and the history of economic thought.

Dimitri B. Papadimitriou is president of The Jerome Levy Economics Institute, executive vice-president of Bard College, and Jerome Levy Professor of Economics at Bard College. His current research focuses on poverty and employment issues; he is examining the effects of demographic shifts on the labour market in an evaluation of the need to revise policies concerning employment and social security. Papadimitriou is the general editor of The Jerome Levy Economics Institute book series and is a contributor to and editor of many titles in the series, such as Modernizing Financial Systems, Stability in the Financial System and Financial Conditions and Macroeconomic Performance: Essays in Honor of Hyman P. Minsky, edited with Steven M. Fazzari. He is currently editing the Collected Economic Papers of Hyman P. Minsky, and is a member of the editorial board of the Review of Income and Wealth.
Malcolm Sawyer is Professor of Economics at the University of Leeds, UK, where he teaches macroeconomics and industrial economics. He is the managing editor of *International Review of Applied Economics*, managing co-editor of *International Papers in Political Economy* and editor of the series New Directions in Modern Economics published by Edward Elgar. He is a member of the Council of the Royal Economic Society. He has published nine books (the most recent is *Unemployment, Imperfect Competition and Macroeconomics: Essays in the Post Keynesian Tradition*, Aldershot: Edward Elgar, 1995), and edited 12 books (the most recent is *The Legacy of Michal Kalecki*, vols 1 and 2, Edward Elgar). He has published nearly one hundred papers on macroeconomics, unemployment and industrial economics, and is currently working on the economics of the euro and the economics of the ‘third way’.

Anna Maria Variato is Assistant Professor at the University of Bergamo, Italy, where she teaches macroeconomics. Her research fields are macroeconomics, investment theory and capital markets, corporate governance, information theory, and debate between Keynesian schools of thought.

L. Randall Wray is Professor of Economics at the University of Missouri–Kansas City as well as Senior Research Associate, the Center for Full Employment and Price Stability (at UMKC). He is a past president of the Association for Institutionalist Thought (AFIT) and on the board of directors of the Association for Evolutionary Economics (AFEE). A student of Hyman P. Minsky while at Washington University in St Louis, Wray has focused on monetary theory and policy, macroeconomics and employment policy. His current research is a critique of orthodox monetary policy and the development of an alternative. He is writing on full employment policy, modern money, and the monetary theory of production. He has published widely in journals and is the author of *Understanding Modern Money: The Key to Full Employment and Price Stability* (Edward Elgar, 1998) and *Money and Credit in Capitalist Economies* (Edward Elgar, 1990).
