

Tables

| | | |
|-----|--|----|
| 1.1 | Conceptualisation and measurement – poverty, deprivation and social exclusion | 7 |
| 1.2 | Risk group definitions | 10 |
| 1.3 | Proportions below the poverty line in 12 EU countries in 1993, ECHP, wave 1 | 15 |
| 1.4 | Countries included in the ECHP survey by year of inception | 18 |
| 1.5 | Sample sizes: ECHP, wave 2, 1994 | 19 |
| 1.6 | Socio-demographic information in the ECHP household and individual questionnaires | 20 |
| 1.7 | Examples of domains and sub-domains of disadvantage in the ECHP household and individual questionnaires | 21 |
| 2.1 | Aggregate poverty and populations' shares of four risk groups in five EU member states | 31 |
| 2.2 | Poverty comparisons of risk groups | 33 |
| 2.3 | Marginal effects and statistical significance of risk variables in multinomial logit analysis | 35 |
| 2.4 | Aggregate non-monetary deprivation indicators in five EU member states | 38 |
| 2.5 | Comparisons of 'risk groups' in terms of material non-monetary deprivation indicators (national average: 100) | 41 |
| 2.6 | Comparisons of 'risk groups' in terms of aggregate material non-monetary deprivation indicators (bottom 20 per cent of the distribution) | 43 |
| 2.7 | Comparisons of 'risk groups' in terms of aggregate material non-monetary deprivation indicators (threshold: 60 per cent of the median) | 45 |
| 2.8 | Proportional decline in the aggregate poverty rate due to social transfers in five EU member states | 47 |
| 2.9 | Proportional decline in the poverty rates of members of households with individuals belonging to a 'risk group' due to social transfers | 48 |
| 3.1 | Young adults in the population | 54 |
| 3.2 | Participation in education and training by age and gender | 57 |
| 3.3 | Highest educational level achieved | 57 |
| 3.4 | Employment and unemployment | 60 |

| | | |
|------|---|-----|
| 3.5 | Type of employment activity: young people aged 16–29 years | 61 |
| 3.6 | Experience of unemployment and long-term unemployment | 62 |
| 3.7 | Income poverty among young people | 69 |
| 3.8 | Factors that prevent or increase poverty among young people | 70 |
| 3.9 | The role of transfers in preventing poverty among households with young people | 71 |
| 3.10 | Young people and material deprivation | 73 |
| 3.11 | Material deprivation and income poverty among young people | 74 |
| 3.12 | Young people and social relationships | 75 |
| 3.13 | Social relations and income poverty: young people | 76 |
| 4.1 | Household type: all households | 82 |
| 4.2 | Household type: households with children | 84 |
| 4.3 | Age and marital status: lone mothers with at least one dependent child | 85 |
| 4.4a | Lone and married mothers with at least one dependent child: main activity | 89 |
| 4.4b | Lone and married mothers with non-dependent children only: main activity | 89 |
| 4.5 | Parental leave and childcare provision – mid 1990s | 91 |
| 4.6 | Poverty rates by household type: individuals under state retirement age | 94 |
| 4.7 | Household items cannot afford: lone mothers and couples | 95 |
| 4.8a | Deprivation measures: individuals under state retirement age in households with at least one dependent child | 97 |
| 4.8b | Deprivation measures: individuals under state retirement age in households with non-dependent children | 97 |
| 4.9 | Social relations: lone and married mothers with at least one dependent child | 98 |
| 5.1 | Incidence of sickness or disability by age and sex: adults below state retirement age | 107 |
| 5.2 | Household type: adults with a sickness or disability | 108 |
| 5.3 | Marital status: adults with a sickness or disability | 109 |
| 5.4 | Education: adults with a sickness or disability | 110 |
| 5.5 | Main activity: adults with a sickness or disability | 111 |
| 5.6 | Income poverty: adults with a sickness or disability | 111 |
| 5.7 | Poverty by socio-economic characteristics: adults with a sickness or disability | 113 |
| 5.8 | Poverty by socio-economic characteristics (not main activity): adults with a sickness or disability | 116 |
| 5.9 | Effectiveness of household social and private transfers in preventing poverty: adults with a sickness or disability | 118 |

| | | |
|------|---|-----|
| 5.10 | Material deprivation and income poverty: adults with a sickness or disability | 120 |
| 5.11 | Social relations by income poverty: adults with a sickness or disability | 121 |
| 6.1 | Retired and young people in the population | 125 |
| 6.2 | Age and sex of retired adults | 125 |
| 6.3 | Marital status and sex of retired adults | 125 |
| 6.4 | Incidence of retirement among adults over 45 years | 129 |
| 6.5 | Main source of personal income for retired adults | 132 |
| 6.6 | Income poverty among retired and all adults | 134 |
| 6.7 | The role of transfers in preventing poverty among retired people | 135 |
| 6.8 | Factors that prevent or increase poverty among retired people | 136 |
| 6.9 | Retired people and material deprivation | 139 |
| 6.10 | Material deprivation and income poverty among retired people | 140 |
| 6.11 | Retired people and social relationships | 142 |
| 6.12 | Social relations and income poverty | 143 |
