

List of tables

3.1	Indicators selected for different types of air pollution in Europe	19
8.1	Climatically relevant substances with strong anthropogenic sources	59
13.1	Coastal impacts	103
14.1	Indicators for characterization of the coastal zone	120
17.1	Main ozone-depleting substances regulated through the Montreal Protocol, their atmospheric lifetime and ozone depletion potential	153
17.2	Estimated changes in the emissions of some of the ODSs regulated by the Montreal Protocol, 1988–92	154
19.1	Recommended actions for the Resource Depletion policy field	174
19.2	SAG suggestions for Resource Depletion indicators	176
21.1	Percentage of pan-European threatened species in one country	187
21A1.1	Cost of resource depletion and air pollution damage in the EU	193
21A1.2	Cost of resource depletion and air pollution damage expressed as percentage of GNP	194
25.1	Classification of heavy metals	224
25.2	Toxicity ranking system based on log H and LC50	229
25.3	Activities causing potential harm	230
30.1	Domestic waste from households, small enterprises and commercial services in the former West Germany	267
32.1	Main European water directives	290
34.1	Water use in France and Spain	305
