

Tables

2A.1	Guaranteed standards in electricity distribution	28
2A.2	Overall standards in electricity distribution	28
2A.3	Guaranteed standards for gas transporters	28
2A.4	Levels of overall standards for gas transporters	29
2A.5	Electricity supply: guaranteed standards	29
2A.6	Electricity supply: overall standards	29
2A.7	Guaranteed metering standards	30
2A.8	Overall metering standards	30
2A.9	Water guaranteed standards scheme	31
2A.10	Total water performance indicators	31
2A.11	Postal service standards	33
3.1	Factors affecting data envelopment	52
3.2	Some comparative efficiency studies	57
4.1	Structure of the Swiss electricity industry	63
4.2	Predictions of average cost for electricity distribution	69
5.1	Tests for gas efficiency model	81
5.2	Tests for dynamic effects	82
5.3	Measured efficiencies using input-orientated DEA model	83
5.4	Factor productivity and slacks	84
6.1	UK coal consumption	88
6.2	UK coal output	89
8.1	Deterministic assumptions for individual development	109
8.2	Deterministic assumptions for cluster-type development	109
8.3	Common infrastructure of cluster	110
8.4	Assumptions for Monte Carlo analysis	119
8.5	Coefficients of variation	132
8.6	Probability of negative NPV	133
8.7	Probability of IRR greater than percentages shown	134
9.1	Underlying energy demand trend	141
9.2	Classification of possible stochastic trend models	151
9.3	Estimated results for UK whole economy energy demand, 1972q1–1995q4	155
9.4	Previous energy demand studies for UK whole economy aggregated energy demand	161

9.5	Estimated results for UK transportation oil demand, 1972q1–1995q4	163
9.6	Previous energy demand studies for UK transport oil demand	169
11.1	Firm data	209
11.2	Number of firms and their emissions by sector	210
11.3	Summary of carbon savings	214
11.4	Reduction in emissions, 2002–2007	216
11.5a	ERM scenario	219
11.5b	ERM scenario >10 per cent emissions reduction	219
11.6a	ERM scenario with reductions doubled	220
11.6b	ERM scenario with reductions doubled >10 per cent emissions reduction	220
11.7a	£50 per tonne for 10 per cent reduction in carbon	221
11.7b	£50 per tonne for 10 per cent reduction in carbon >10 per cent emissions reduction	221
11.8	Summary	221
