| <i>List of figures</i> | vii |
| <i>List of tables</i> | ix |
| <i>List of contributors</i> | xi |
| 1 Introduction <i>Pier Paolo Saviotti</i> | 1 |
| PART I EMPIRICAL STUDIES | |
| 2 Technological paradigms and the evolution of networks: lessons from the pharmaceutical industry <i>Fabio Pammolli and Massimo Riccaboni</i> | 35 |
| 3 Increasing returns and network structure in the evolutionary dynamics of industries <i>Andrea Bonaccorsi and Paola Giuri</i> | 50 |
| 4 The evolution of specialization: public research in the chemical and pharmaceutical industries <i>Aldo Geuna</i> | 94 |
| 5 Evolutionary patterns of innovation and product life cycle: empirical evidence from the electric motors industry <i>Edmar Luiz Fagundes de Almeida</i> | 122 |
| 6 Coping collectively with the exploration–exploitation trade-off in research consortia: the case of advanced batteries for electric vehicles <i>Philippe Larrue</i> | 150 |
| 7 Innovation direction and persistence within an industry: the refining processes case <i>François Bel and Bernard Bourgeois</i> | 179 |
| 8 An evolutionary view on persistence in innovation: an empirical application of duration models <i>C. Le Bas, A. Cabagnols and C. Gay</i> | 210 |

PART II SIMULATION STUDIES

| | | |
|----|--|-----|
| 9 | Twin peaks: what the knowledge-based approach can say about the dynamics of the world income distribution <i>Andreas Pyka, Jens J. Krüger and Uwe Cantner</i> | 235 |
| 10 | 'Leaping across the mountains, bounding over the hills': punctualism and gradualism in economic development <i>Witold Kwasnicki</i> | 260 |
| 11 | Unlocking a lock-in: towards a model of technological succession <i>Paul Windrum</i> | 292 |
| 12 | Selection and the learning curve <i>P.A. Geroski and M. Mazzucato</i> | 322 |
| | <i>Index</i> | 337 |
