

Boxes

1.1	Using stated preference techniques to value different notions of equity	35
1.2	Community meetings ‘versus’ contingent valuation in Lugazi, Uganda	39
A1.3.1	Discounting and safety	57
A1.3.2	Individuals’ discount rates in the UK: evidence from stated preference techniques	58
2.1	Mixed monetary and non-monetary approaches: the NATA framework	72
3.1	Sampling design: some transport safety illustrations	100
3.2	Choosing the sample size: an illustration	109
4.1	Valuing the benefits of London hostels to the homeless: describing the policy change of interest	126
4.2	Valuing the benefits of London hostels to the homeless: the constructed market	129
4.3	Example of a CV scenario with no clearly defined payment vehicle	133
4.4	Example of a payment card using monthly and yearly equivalent amounts	135
4.5	Valuing the benefits of London hostels to the homeless: the method of compensation	136
4.6	Example of a payment ladder used in the elicitation of WTP to avoid increased abstractions from the River Ouse	140
4.7	Examples of budget and substitute reminders	143
4.8	Approaches used to increase the accuracy of WTA answers	144
4.9	WTP follow-up questions	146
4.10	Scenario follow-up questions	147
4.11	Types of information elicited in a waste management CV survey	149
A4.1.1	Framing questions	157
A4.1.2	Examples of unstructured questions	160
A4.1.3	Examples of a pre-coded unstructured question	161
A4.1.4	Example of a dichotomous choice question	161
A4.1.5	Example of a multiple choice question	162
A4.1.6	Example of a scale	162
A4.1.7	Example of a paired comparison	165

A4.1.8	Example of a graded paired comparison	166
A4.1.9	Example of a rank order scale	167
A4.1.10	Example of a constant sum scale	168
A4.1.11	Example of a continuous rating scale	169
A4.1.12	Example of a simple itemised rating scale	170
A4.1.13	Example of a Likert scale	171
A4.1.14	Example of a semantic differential scale	171
A4.1.15	Example of a stapel scale	172
5.1	Data on WTP from CV surveys	175
A5.1.1	Probability distributions	202
6.1	Illustrative choice experiment question	251
6.2	Choice experiments for forest landscapes	252
6.3	Choice experiments and agri-environmental policy	254
6.4	Illustrative contingent ranking question	255
6.5	Illustrative contingent rating question	256
6.6	Illustrative paired comparisons question	256
6.7	Valuing biodiversity: contingent valuation and contingent ranking	269
7.1	Two examples of choice modelling in the healthcare context	285
7.2	Choice alternatives used in a survey of leisure time	291
8.1	Construct validity in a safety context	315
8.2	Scope and risk reduction	323
8.3	Embedding and sequencing in the safety context	326
8.4	WTA and WTP in a safety context	328
8.5	CV reliability in the safety context	335
9.1	The present non-user's benefits of preserving the present condition of the Norfolk Broads aggregated across Great Britain using various procedures	357
11.1	Moose hunting in Alberta, Canada	370
11.2	Fishing in Nevada	372
11.3	Walker Lake, Nevada	372
11.4	Bathing water quality in Scotland	374
