James Baines has been active in the field of SIA for about 15 years. While practising mainly in New Zealand, he has paid particular attention to developing methods for analysing field materials and to reporting SIAs in ways that are useful to decision makers and other potential users. In recent years he has pioneered a substantial research programme focusing on ex-post assessments of social impacts from a range of facilities, beginning with solid waste and waste-water facilities and, lately, residential facilities (prisons) and large retail facilities. Together with Nick Taylor, he is currently engaged by UNDP to assist in the institutionalizing of SIA in Malaysia.
