

Tables

1.1	Incentives for child support payments: an example	19
3.1	State of Wisconsin child support guidelines	62
3.2	Child costs as estimated by Espenshade	65
3.3	Dollar value of presumptive awards: one child	74
3.4	Dollar value of presumptive awards: two children	75
3.5	Dollar value of presumptive awards: three children	76
3.6	Poverty thresholds, 2001	77
3.7	Parenting time adjusted poverty thresholds, 2001	78
3.8	The standard of living impact of Pennsylvania's income shares guideline	78
3.9	Custodial parent's standard of living, Wisconsin-style guideline, gross income	80
3.10	Custodial parent's standard of living, Wisconsin-style guideline, net income	81
3.11	Custodial parent's standard of living, income shares guideline, Espenshade–Engel estimator	82
3.12	Custodial parent's standard of living, income shares guideline, Betson–Rothbarth estimator	83
3.13	Custodial parent's standard of living, child cost table based guideline, 'shared responsibility'	84
3.14	Custodial parent's standard of living, cost shares guideline, without tax benefits	85
3.15	Custodial parent's standard of living, cost shares guideline, with tax benefits	86
4.1	Percentages of child expenses, by income level and age of child	103
4.2	Example calculations	105
4.3	CP's gross income amounts	107
4.4	CP's % of NCP's gross income	108
4.5	Percentage of NCP's income necessary for CP to maintain standard of living	110
4.6	Sensitivity analysis for three scenarios	118
8.1	Adjustment for visitation	222
9.1	Summary statistics	246
9.2	Youth behaviour by family structure, father's visitation and child support receipt	247

9.3	Family income and child support receipt by mother's characteristics	252
9.4	Smoking probits	256
9.5	Sexual activity probits	258
9.6	Conviction probits	260
Appendix Table 1 Youth behaviour by family structure, father's visitation and child support receipt by gender		268
10.1	Arrest rates and household incomes for various family structures	276
10.2	Arrest rates and household incomes by racial categories	278
10.3	Arrest rates and child support for various family structures	278
10.4	Probabilities of boys being arrested between ages 12 and 16	280
10.5	Probit equations explaining whether boys between 12 and 16 have ever been arrested	282
10.6	Probit equations explaining whether boys between 12 and 16 have ever been arrested, limited sample	284
