<i>List of figures</i>	ix
<i>List of tables</i>	xi
<i>Preface</i>	xiii
1 Introduction	1
2 The hedonic approach	9
Development of the hedonic conception	9
Rosen's method and work in the 1970s	10
Econometrics after the 1980s	13
Scotchmer's crucial comments	15
Reconsideration of capitalization theory	16
3 Theory of capitalization hypothesis	18
Two types of capitalization	18
Theory of cross-sectional capitalization	21
Extension	27
Conclusion	28
4 Hedonic measure as an approximation of benefit	29
Introduction	29
Examination of overestimation ratio	29
Results	31
An extension: CES functions	33
5 Empirical examination of the accuracy of the hedonic measure	37
Large national project evaluation	37
Introduction of accessibility and the model revised	37
Parameter estimation method and data	39
Results	42
Conclusion	44
6 Comparison with contingent valuation method	45
Meaning of comparison	45
Air pollution	46

	Water Environment	47
	Conclusion	49
7	Estimation of hedonic price function	51
	Introduction	51
	Market segmentation and sample size for hedonic analysis	51
	Types of property data	52
	Explanatory characteristics of a property	61
	Making variables fit the reality	63
	Hedonic price function and unit and form of variables	68
8	Hedonic price method in estimating the value of environment and institutional regulation	71
	Introduction	71
	Changes in consumer preference on an upper-class housing estate in Tokyo, 1934 and 1985	71
	Amenity value	74
	Environmental cost	87
	Value of institutional measures: The regulation on floor to land area ratio in the CBD	95
	Characteristics of the values of the environment and public services	96
	Concluding remark	101
9	Environmental cost–benefit analysis using the hedonic price method	102
	Introduction	102
	Basic principles of cost–benefit analysis	102
	Procedure	111
	A numerical example	117
	Conclusions	123
10	Concluding remarks	125
	Appendix 1 Proof of time-series capitalization	127
	Appendix 2 Proof of the overestimation theorem	130
	Appendix 3 Proof of equality conditions	134
	Appendix 4 Model and proof of the overestimation theorem in the case of heterogeneous consumers	139
	Appendix 5 Short-run case	141
	Appendix 6 Two-region general equilibrium model	144

Appendix 7	Two-region two type of consumer general equilibrium model	147
Appendix 8	Schedule of benefits and costs	150
