

## Tables

---

2.1	Unemployment rates using national and Eurostat data	30
2.2	Share of total employment in agriculture, industry and services in Britain and Germany, selected years, 1975–96	41
2.3	Labour force activity rates, percentage of working age population (15–64 years) by age group, 1984 and 1996	42
2.4	Proportion of young children in publicly funded childcare and at school	45
2.5	Percentage of people in employment working part-time, 1983 and 1996, by sex	47
2.6	Percentage of couples in Britain and Germany in different labour market situations	50
3.1	Benefits paid to the unemployed in Britain and Germany	64
3.2	The incidence of unemployment benefit refusals and sanctions	76
3.3	Percentage of ILO unemployed receiving insurance-based and means-tested unemployment compensation, by gender	77
3.4	Percentage of ILO unemployed receiving insurance-based and means-tested unemployment compensation, by age	79
3.5	Income replacement rates by family type in Britain and Germany, after six months and two years of unemployment (1993)	80
3.1.A	Changes to benefit entitlement periods for German insurance benefit ( <i>Arbeitslosengeld</i> ) since the mid-1980s	88
4.1	Proportion of all unemployed individuals aged 18–64 under various median income poverty lines, Britain (1993) and Germany (1996)	101
4.2	Odds of employed and unemployed of working age falling below the 50 per cent median income poverty line, Britain (1993) and West and East Germany (1996)	102
4.3	Percentage of unemployed under the 50 per cent income poverty line by type of benefit received, Britain (1993) and Germany (1996)	103
4.4	Percentage of unemployed under 40, 50 and 60 per cent median income poverty lines by gender, Britain (1993), West and East Germany (1996)	106

4.5	Unemployed men and women by household type, Britain (1993) and West and East Germany (1996)	107
4.6	Odds of unemployed individuals falling below the 50 per cent median income poverty line, Britain (1993) and East and West Germany (1996)	109
4.7	Percentage change in mean of monthly equivalised income for different groups, Britain and West and East Germany	112
5.1	Competing risks piecewise constant exponential model for Britain and West Germany	134
5.2	Competing risks piecewise constant exponential model for British and West German men and women: transition from unemployment to employment	140
6.1	Employment rates of married women aged 18–55 in Britain and West Germany, 1991	148
6.2	Comparing labour force status of working-age partners of employed and unemployed men in Britain (1991–97) and West Germany (1988–93)	156
6.3	Estimates of parameters of hazard rates: transition from labour force inactivity to employment	161
6.4	Estimates of parameters of hazard rates: transition from employment to labour force inactivity	163
6.5	Estimates of hazard rates for transitions between full-time work, part-time work and non-participation	165
6.1.A	Estimates of parameters of hazard rates – transition from labour force inactivity to employment, Britain and Germany, model 1	171
6.2.A	Estimates of parameters of hazard rates – transition from employment to labour force inactivity, Britain and Germany, model 4	172
A.1.1	Development of sample sizes of individuals in the GSOEP (1984–96) and BHPS (1991–96)	192
A.1.2	Comparing samples of the unemployed in the GSOEP, 1996	195
A.1.3	Comparing samples of the unemployed in the BHPS, 1993	197
