Frank G.A. de Bakker is an Assistant Professor in Strategic Management at the Faculty of Social Sciences of the Vrije Universiteit, Amsterdam, the Netherlands. He obtained his PhD at the University of Twente. His PhD research focused on organizational aspects of product-oriented environmental management. Insights on capability building processes, stakeholder theory and ideas on continuous improvement and total quality management were combined in that research. His work has been published in *Business Strategy and the Environment*, *Journal of Industrial Ecology*, and *Journal of Cleaner Production*, among others. At present, his research is focused on corporate social responsibility, institutional change and social movements.

Rianne de Leeuw is a Research Associate at University of Twente, CSTM/Cartesius Institute, the Netherlands. Her research focuses on environmental and social interests in business investment decisions. She is programme manager of the international ‘Master of Environmental Business Administration; Environmental and Energy Management’. This is a joint programme of the Centre for Clean Technology and Environmental Policy (CSTM), the Cartesius Institute and the Technology and Development Group (TDG) of the University of Twente.

Magali A. Delmas is an Assistant Professor of Business Strategy at the Donald Bren School of Environmental Science & Management at the University of California Santa Barbara. She received her PhD from HEC Graduate School of Management in Paris and previously studied at the Institut d’Etudes Politiques of Paris. Prior to embarking on an academic career, Magali Delmas worked in Corporate Strategy at Framatome, a nuclear engineering company. She subsequently worked at the European Commission at the Directorate General for Industry where she was the economic advisor of the Director General. She was also a consultant in Public Policy Evaluation and Strategic Management at CM International, Paris. Magali Delmas’ research is on the interaction between regulation and firms’ competitive strategies. She is currently analysing how alternative forms of environmental regulations, such as voluntary agreements and self-regulation, can impact firms’ competitive advantage. Magali Delmas has...
