<i>List of contributors</i>	vii
<i>Preface</i>	ix
PART I INTRODUCTION	
1 Introduction	3
<i>Jens Laage-Hellman, Maureen McKelvey and Annika Rickne</i>	
2 Conceptualizing and measuring modern biotechnology	20
<i>Johan Brink, Maureen McKelvey and Keith Smith</i>	
PART II SETTING THE SCENE	
3 Stylized facts about innovation processes in modern biotechnology	43
<i>Maureen McKelvey, Annika Rickne and Jens Laage-Hellman</i>	
4 The post-genome era: rupture in the organization of the life science industry?	76
<i>Michel Quéré</i>	
5 An overview of biotechnology innovation in Europe: firms, demand, government policy and research	99
<i>Jacqueline Senker</i>	
PART III CHALLENGING THE EXISTING	
6 Risk management and the commercialization of human genetic testing in the UK	135
<i>Michael M. Hopkins and Paul Nightingale</i>	
7 Networks and technology systems in science-driven fields: the case of European food biotechnology	167
<i>Finn Valentin and Rasmus Lund Jensen</i>	
8 Future imperfect: the response of the insurance industry to the emergence of predictive genetic testing	207
<i>Stefano Brusoni, Rachel Cutts and Aldo Geuna</i>	

9	Emergent bioinformatics and newly distributed innovation processes <i>Andrew McMeekin, Mark Harvey and Sally Gee</i>	235
PART IV FORMING THE NEW		
10	The dynamics of regional specialization in modern biotechnology: comparing two regions in Sweden and two regions in Australia, 1977–2001 <i>Johan Brink, Linus Dahlander and Maureen McKelvey</i>	265
11	On the spatial dimension of firm formation <i>Annika Rickne</i>	295
12	Examining the marketplace for ideas: how local are Europe's biotechnology clusters? <i>Steven Casper and Fiona Murray</i>	326
13	Creation and growth of high-tech SMEs: the role of the local environment <i>Corinne Autant-Bernard, Vincent Mangematin and Nadine Massard</i>	356
PART V CONCLUSIONS		
14	Reflections and ways forward <i>Hannah Kettler, Maureen McKelvey and Luigi Orsenigo</i>	395
	<i>Index</i>	407
