

Figures

2.1	Range of utility function possibilities	25
5.1	Wealth gains for myopic maximizing strategy	87
5.2	Wealth gains for the randomizing strategy	88
5.3	Wealth gains for the adaptive coupling strategy	88
6.1	Gross Production (GP) approach to equilibrium, $w_M = 0.056$	99
6.2	GP as a function of time, $w_M = 0.077$, short term	99
6.3	GP as a function of time, $w_M = 0.033$, short term	101
6.4	GP as a function of time, $w_M = 0.033$, long term	102
6.5	Wealth of sectors as a function of time, $w_M = 0.033$, without social tax	103
6.6	Wealth as a function of time, $w_M = 0.033$, with social tax, stable case	105
6.7	GP as a function of time, $w_M = 0.033$, with social tax	105
7.1	Three- and five-sector models of the economy	119
C.1	Wealth as a function of stock. $Z = X^{1/2}M^{1/2}$ for $M = 100$	161
C.2	Value as a function of stock. $v = (M/X)^{1/2}$ for $M = 100$	162
C.3	Logarithmic wealth function: $Z = X [\ln (M/X) - 1]$ for $M = 50$	165
C.4	Value as a function of stock X: Logarithmic wealth function $v = (M/X) \ln (M/X)$	166
C.5	LINEX wealth function: $Z = (X_1X_2M)^{1/3} \exp (-X_2/X_1)$, $X_2 = 10$, $M = 10$	167
C.6	Value of X_1 . $v = M(1/X_1 - 3/X_2)$, $X_2 = 100$, $M = 10$	168
C.7	Wealth as a function of trade. $M = 100$, $X = 50$, $p = 1$	172
C.8	Quantity to sell or buy, LINEX function	172
C.9	Quantity to sell or buy logarithmic wealth function with $M = 100$, $X = 50$	173
D.1	Price agreement $p = f(x)$ for $v(\alpha, i) = 2$ and $v(\beta, i) = 4$	177
