Introduction	1
<i>Joseph C. Cooper, Federico Perali and Marcella Veronesi</i>	
PART I ASSESSMENT	
1. Estimating the level of functions supplied by a natural area using GIS information	7
<i>Michele Carta, Nicola Gallinaro and Massimo Bianchi</i>	
1.1 Introduction	7
1.2 Methodology	7
1.3 Project stages	10
1.4 Data input and database set-up	11
1.5 The analysis stage	12
1.6 Results	14
1.7 Conclusions	37
2. The supply of functions by homogeneous area using cluster analysis	41
<i>Paola De Agostini, Veronica Cicogna and Federico Perali</i>	
2.1 Introduction	41
2.2 Cluster analysis methodology	42
2.3 GIS database and definition of the functions of the natural area	44
2.4 Interpretation of results	47
2.5 Conclusions	66
3. A contingent valuation method incorporating fairness and citizen participation	70
<i>Joseph C. Cooper, Federico Perali, Nicola Tommasi and Marcella Veronesi</i>	
3.1 Introduction	70
3.2 Comparison of the survey formats	73
3.3 A field test of the FOOHB and OOHB formats	81
3.4 Conclusions	89

4.	Travel cost estimation conditional on leisure consumption <i>Joseph C. Cooper, Federico Perali, Nicola Tommasi and Marcella Veronesi</i>	93
4.1	Introduction	93
4.2	Econometric models for the travel cost method conditional on leisure consumption	95
4.3	Study site and data gathering	100
4.4	Results	101
4.5	Conclusions	109
	Appendix: econometric methods for censored variables	112
PART II MANAGEMENT		
5.	Identifying the best combination of environmental functions using multi-criteria analysis <i>Paola De Agostini</i>	121
5.1	Introduction	121
5.2	Forest planning	123
5.3	Multi-criteria analysis	127
5.4	Multi-objective models: solution methodology	129
5.5	Identifying the best forest plan using multi-criteria analysis	135
5.6	Identifying the best forest plan integrating geographical information system, contingent valuation and multi-criteria analysis	146
5.7	Conclusions	149
	Appendix: the concept of metric	156
6.	Simulating the impact on the local economy of alternative management scenarios for natural areas <i>Paola De Agostini, Stefania Lovo, Francesco Pecci, Federico Perali and Michele Baggio</i>	159
6.1	Introduction	159
6.2	The local social accounting matrix for the West Garda area: design and data requirements	162
6.3	The multiplier analysis	169
6.4	Simulations and results	173
6.5	Conclusions	177
	Appendix: data sources	179

	<i>Contents</i>	vii
7.	Resolving conflicts in a natural area	188
	<i>Michele Baggio</i>	
7.1	Introduction	188
7.2	Game theory and conflict resolution	190
7.3	Conflict resolution and search for consensus	202
7.4	Conclusions	208
	Conclusions	212
	<i>Joseph C. Cooper, Federico Perali and Marcella Veronesi</i>	
	Appendix: West Garda Regional Forest survey – a platform for policy analysis	220
	<i>Nicola Tommasi and Marcella Veronesi</i>	
	<i>Index</i>	235
