Vladimir Hlasny is Assistant Professor of Economics at Ewha Womans University in Seoul, and is currently a visiting fellow at the International Centre for Economic Research. His research centres on industrial organization and environmental economics. He has studied causes and consequences of recent regulatory reforms in utility industries, including natural

gas, electricity and telecommunications. Vladimir has also evaluated environmental policies dealing with air pollution and biological invasions. He holds a doctorate in economics from Michigan State University.

Grazia Ietto-Gillies is Emeritus Professor of Applied Economics at London South Bank University and Visiting Professor at Birkbeck University of London. She has been Director of the Centre for International Business Studies at London South Bank University from 1992 to 2010. Her main research areas are transnational companies, their theories, activities and effects; indices of internationalization; globalization; impact of internationalization on innovation. She has also worked on methodology of economics; demarcation of services and manufacturing; healthcare in UK; and de-industrialization. She has written several books, co-edited three volumes, and published over 40 articles in academic journals and many chapters in edited books.

Emmanuel Lazega is Professor of Sociology at the University of Paris-Dauphine, a member of the Institut de Recherche Interdisciplinaire en Sciences Sociales (IRISSO-CNRS). His current research focuses on social, intra- and inter-organizational networks in the economy, with a substantive focus on the social control of business and a methodological focus on the dynamics of these multi-level networks. Publications include *Conventions and Structures in Economic Organization: Markets, Networks, and Hierarchies* (Edward Elgar, 2002, edited with Olivier Favereau); *The Collegial Phenomenon: The Social Mechanisms of Cooperation Among Peers in a Corporate Law Partnership* (Oxford University Press, 2001); and *Micropolitics of Knowledge: Communication and Indirect Control in Workgroups* (Aldine-de Gruyter, 1992).

Lise Mounier is a research fellow at Centre National de la Recherche Scientifique in Paris. Her work focuses on professional groups and social networks. With Emmanuel Lazega she has undertaken several research projects in the field of structural economic sociology, analysing the business world and judicial institutions in France.

Constantine E. Passaris is Professor of Economics and Chairman of the Department of Economics at the University of New Brunswick, Canada. His scholarly publications have appeared as monographs, encyclopaedia entries, book chapters and refereed journal articles. Constantine has been a member of the Economic Council of Canada, chairman of the New Brunswick Human Rights Commission, Canadian advisor to the Canadian Commission for UNESCO, a member of the Premier's Roundtable on New Brunswick Self Sufficiency and chairman of the New Brunswick Advisory Board on Population Growth.

Luis Rivas is professor of Economics at IE University, Segovia, Spain, and Universidad Pontificia de Salamanca, Spain. He has supervised and participated in several national and international research projects. He has been a researcher at several universities in the US, France and Portugal, and at the Ministry of Economics and Institute of Fiscal Studies in Spain. He specializes in growth, public economics and international economics and has written articles in prestigious international journals. As a professor he has lectured, besides Spain, in countries such as Ireland, Bolivia, the US, Poland, Germany, Dominican Republic, Mexico and the UK.

David Sunderland is Reader in Business History at the University of Greenwich, London. He is the author of *Managing the British Empire* (Boydell & Brewer, 2004); *Managing British Colonial and Post-Colonial Development* (Boydell & Brewer, 2007); *Social Capital, Trust and the Industrial Revolution, 1780–1880* (Routledge, 2007); and *An Economic History of London, 1800–1914* (co-authored with Dr Michael Ball) (Routledge, 2006).

Mathew Tsamenyi is Professor of Accounting at the University of Birmingham, UK and Visiting Professor of Accounting at the China Europe International Business School (CEIBS) where he teaches on their African programme. His main research interests are in the areas of management accounting and control systems, accounting systems in emerging economies and public sector reforms, privatization and accounting and accountability systems. Professor Tsamenyi has consulted widely for various organizations including the United Nations Conference on Trade and Development (UNCTAD) and the Netherlands Development Organization. He has delivered courses in several countries including the UK, Hong Kong, Singapore, Malaysia and Ghana. Professor Tsamenyi has published over 20 articles in leading international journals and he is the co-editor of the *Journal of Accounting in Emerging Economies* and the *Research in Accounting in Emerging Economies* series.

Paola Tubaro is Lecturer in Economic Sociology at the University of Greenwich, London, UK. She has a PhD in Economics, jointly awarded by the University of Paris Ouest, France, and the University of Frankfurt, Germany. Her current research interests include intra- and inter-organizational relationships in markets, with focus on regulation and governance systems, both formal and informal; and consumer choice, particularly behavioural changes induced by ubiquitous computer-based communication and their ethical and societal effects. Methodologically, her work is grounded in empirical social network analysis techniques and

agent-based computer simulation, emphasizing the emergence of system-level regularities from individual behaviours and interactions.

Mehmet Ugur is Jean Monnet Reader in Political Economy in the Department of International Business and Economics at the University of Greenwich Business School. He researches the impact of credible commitment mechanisms and governance structures on economic, organizational and political outcomes. He has applied this framework to a large number of issues ranging from corporate governance through European integration to economics of regulation in network industries. He is currently the convenor of the MA/MSc in Business and Financial Economics and departmental research coordinator. He is a member of the Economic Governance Research Group (EGRG) and of the Centre for Governance, Risk and Accountability in the Business School, University of Greenwich. He has published five monographs and edited books, and over 40 journal articles and book chapters.

Marie-Ange Véganzonès-Varoudakis is a research fellow at the Centre National de la Recherche Scientifique (CNRS), Centre d'Etudes et de Recherches sur le Développement International (CERDI), Université d'Auvergne, France. She holds a PhD from the Institut d'Etudes Politiques (IEP) of Paris. She has held assignments with the World Bank, the OECD, the French Ministry of Economy and the UN. Her research is in economic policy and economic growth, exchange rate regimes and export performance, trade openness and foreign direct investment (FDI), governance institutions and private investment, investment climate and firms' productivity. She has published the results of her research in a large number of scholarly journals.

Cláudio de Araújo Wanderley is PhD in Accounting from the Management School, University of Sheffield. He is also a lecturer of Accounting at Federal University of Pernambuco, Brazil. His main research interests are in the areas of management accounting and performance measurement, accounting systems in emerging economies, public sector reforms, privatization and accounting and regulatory accounting in the Electricity sector.
