Bertalanffy, Ludwig von 102  
books in the evaluation process 199–214  
    evaluation helping structure production of research 200  
    observations  
        broad distribution of ideas requires books to be in English 209  
        business model of publishing in social sciences is in trouble 202–3

- coordinated action to promote evaluation of management books 209–10
- different kinds of management books, and quality varies 203–4
- evaluating options rely on complex and expensive processes 207–9
- focus on journals to the detriment of books 220–21
- many options for the evaluating process 205–7
- need for management books 201–2
- publishing of books by management researchers being discouraged 200–201
- recommendations
  - combine selection processes for research projects/evaluating/funding 212–13
  - create a support movement for pro-book and book evaluation policy 211
  - encourage books that analyse/improve management practices 210–11
  - encourage evaluating means to be shared, criticised and made public 212
  - ensure books are included in evaluating researchers/institutions 211
  - evaluating authorities to take account of work of evaluators 213
  - facilitate variety of evaluation networks 211–12
  - promote databases for books not in English, and use of digitisation 213
  - promote production/distribution/reading of quality management books 210
  - typology of books 203–4
- bottom-up process 129, 132
