

# Figures

---

1.1	Interaction of measure (before and after crisis) and ethnicity (Albanians and Pontics) in the heritage dimension of acculturation	13
1.2	Interaction of the heritage dimension of acculturation with ethnicity in predicting life satisfaction	14
3.1	Predictors of financial well-being: theoretical model	52
6.1	Stress of recession model	102
9.1	Organizational methods in coping during a recession	156
9.2	The vicious cycle	157
9.3	The adaptation curve	163
10.1	A multilevel model of job insecurity	179
12.1	A psychological framework for understanding the experience of job loss	210
15.1	Percentage of types of restructuring across the years 2002 to 2010 in the EU	262
15.2	Announced job losses and job gains for the EU between 2006 and 2010	263
17.1	Significant lagged paths ( $p < 0.05$ ) in the reciprocal model of WFC, showing both causal and reversed causal relations among work pressure, WFC and job satisfaction (N = 310)	299
17.2	Significant lagged paths ( $p < 0.05$ ) in the reciprocal model of FWC, showing both causal and reversed causal relations among family pressure, FWC and family satisfaction (N = 310)	299
17.3	Significant paths ( $p < 0.05$ ) in the reciprocal model of WFE, showing both causal and reversed causal relations among work resources, WFE and job satisfaction (N = 310)	303
17.4	Significant paths ( $p < 0.05$ ) in the reciprocal model of FWE, showing both causal and reversed causal relations among family resources, FWE and family satisfaction (N = 310)	304
