

Figures

2.1	World oil production by OPEC/non-OPEC in the reference scenario	15
2.2	Energy-related CO ₂ emissions in the reference scenario	15
2.3	Pathways to bring emissions to a safe level	17
2.4	Reductions of energy-related CO ₂ emissions in different climate scenarios	18
5.1	CO ₂ spot price and traded volume during the first ETS trading period	77
5.2	Theoretical coal to gas CO ₂ switch price and CO ₂ real spot and future prices (€/MWh)	78
5.3	Difference between CO ₂ real and theoretical coal to gas switch prices (€/MWh)	79
5.4	Trend of CO ₂ spot and future prices during the first ETS trading period (€/Mton)	84
5.5	ETS proportional target range and ETS 2005–2007 cap (normalized values)	91
5.6	ETS proportional target range and ETS 2008–2012 cap (normalized values)	92
6.1	Graphic interpretation of the polluter-pays principle	105
7.1	ETS third trading period cap	128
7.2	ETS third trading period allocation rule	131
7.3	Exposure to carbon leakage: the ‘separated approach’	137
7.4	Exposure to carbon leakage: the ‘integrated approach’	138
7.5	Areas of exposure to carbon leakage	143
