technology treadmill model 177
terminator technology 435
Territorial Plant Protection stations, Cuba 195–6
testing for GM content, Canadian flax 846–7
1,1,2,2-tetrachloroethan (TTCE) removal 831
Theory of Social Cost 38
threshold levels and labelling, EU 380–81
tillage practices
and GM adoption decision 361
and HT crops 451
and HT soybeans 575–7, 730
TISCs (Technology Innovation Support Centers) 338
tobacco genomics research, Cuba 198–9
toll goods 39
tomato, Flavr Savr™ 552, 843–4, 847–8, 849
trade 217–27
and coexistence practices 385–6
and concerns about GM crops 249
and GM crops 32–4
influence on African regulatory systems 174
trade blocs, Latin America 185–6
trade policies
EU beef import ban 223
EU moratorium on GM products 846–7
and food security 500–501
impact on gains from biotechnology 712–13
Trade Related Aspects of Intellectual Property (TRIPS) 72, 225–6, 235–6, 426, 510–11
traditional knowledge and IPRs 507, 516–18
tragedy of the anti-commons 634
traits 26
trait development valuation 758–62
trait efficiency 760
transaction cost economics 62
transformation of small grains 777–9
transformative change 4
gene outcrossing, GM rice 684
trichloroethene (TCE) removal 831
Triffid flax 845–7, 850
Triple Helix model 37
TRIPS Agreement 72, 225–6, 235–6, 426, 510–11
TTCE (1,1,2,2-tetrachloroethan) removal 831
UC Berkeley and Africa Biofortified Sorghum project 332
Uganda, GM bananas 793–803
consumer acceptance 249
disease resistance 107–8
Ukraine, GM crop plantings 32
uncertainty in agbiotech supply chains 63
