

Acknowledgements

During the years 2010 – 2012 many students of the ISS Course 9150 asked questions that helped to (re)focus the manuscript. This book would not have existed without their input.

Sameer Khatiwada and Verónica Escudero guided me through the ILO statistics; Figure 6.1 is based on the underlying data of the ILO's 2012 *World of Work* report and were kindly provided by the Institute for Labour Studies. Figure 6.3 appears by permission of Chris Elvidge and co-authors. Figure 11.3 appears by permission of the International Competition Network. Alex Dreher supplied the data of the world data for the KOF index of globalization reported in Figure 13.2.

The manuscript benefitted from detailed comments by Djalita Fialho, Jan van Heemst, Rolph van der Hoeven, Wil Hout and Howard Nicholas. The analyses in Part III were presented during the early autumn of 2012 at seminars at the universities of Antwerp (12 September) and Groningen (19 October) and these discussions helped me to clarify my thinking on the economics of the provision of global public goods. Ward Warmerdam and Victoria Litherland provided useful editorial services.
