André Torre is research director at INRA (French National Institute for Agricultural Research) and AgroParisTech (the main school of engineers in this field) in Paris. He teaches in several French universities. He is Chief Editor of the *Revue d'Economie Régionale et Urbaine* and immediate past-President of the French-speaking section of RSAI (Regional Science Association International). He is currently head of the national PSDR (For and About Regional Development) research programme, which involves various teams and stakeholders from ten French regions. André Torre has published 11 books and 15 special issues of scientific peer review journals, as well as 200 papers on the topics of proximity, innovation and regional development.

Frédéric Wallet is a researcher at INRA (French National Institute for Agricultural Research) and AgroParisTech in Paris. His research interests include governance and institutional innovation processes and their influence on regional development, in particular in rural and suburban areas. He teaches in several universities and French engineering schools, and is an expert for the French government on issues of rural development. He has published 20 articles and contributed to several books. Currently, he is national manager of the PSDR (For and About Regional Development) research program, and a member of the editorial board of *Géographie, Economie et Société*.

Antoine Bailly, Emeritus Professor, University of Geneva, is the President of the Scientific Council of PSDR (For and About Regional Development) and of Forum Santé Switzerland. He received the Founder's Medal of Regional Science in 2008 and was awarded the Vautrin Lud, the 'Nobel' prize of geography in 2011. He has written more than 30 books in regional science, medicometry and well being geography. As a pioneer of behavioural geography and new geography, he has been awarded three doctorate honoris causa.

Pierre-Alexandre Balland is a post-doctoral researcher in economic geography and economics of innovation at the Urban and Regional research centre Utrecht (URU) at Utrecht University. He received his PhD in Economics at the University of Toulouse in 2010. In his

research, Pierre-Alexandre applies a network approach to understand knowledge dynamics (emergence, transfer, diffusion of knowledge) and how it matters for the competitive advantage of organizations or cities. He has published in several international journals such as *Journal of Economic Geography*, *Regional Studies* and *Economics of Innovation and Technological Change*. His personal webpage is <http://econ.geo.uu.nl/balland/balland.html>.

Harald Bathelt holds the Canada Research Chair in Innovation and Governance at the Department of Political Science, University of Toronto. He is also cross-appointed in the University of Toronto's Department of Geography and Program in Planning, and Zijiang Visiting Chair at East China Normal University, Shanghai. His research interests include clusters, innovation systems and knowledge-creation, political economy, industrial restructuring, globalization, and regional policy and governance. Recent publications include *Wirtschaftsgeographie* (2012) and *The Relational Economy* (2011). He is currently preparing a book on *Trade Shows in the Globalizing Knowledge Economy* and a major *Companion on Innovation and Knowledge Creation*. He has published many conceptual and empirical articles in leading academic journals and is Editor of the *Journal of Economic Geography*.

Ron Boschma is full Professor in Innovation Studies at Lund University in Sweden, and director of the Centre for Innovation, Research and Competence in the Learning Economy (CIRCLE) at Lund University. He is also full Professor in Regional Economics at the Department of Economic Geography at the Faculty of Geosciences, University of Utrecht in the Netherlands. Boschma has widely published in international journals on evolutionary economic geography, the spatial evolution of industries, regional systems of innovation, the structure and evolution of networks, agglomeration externalities and regional growth. Boschma is Deputy Chief Editor of *Regional Studies* and Editor of the working paper series *Papers in Evolutionary Economic Geography*. His home page is <http://econ.geo.uu.nl/boschma/boschma.html>.

Olivier Bouba-Olga is full Professor at the University of Poitiers, France. His main research interests are the geography of innovation, proximity dynamics, firms' location strategies and local labour markets. Home page: <http://crief.labo.univ-poitiers.fr/spip.php?article10>.

Roberto Camagni is full Professor of Urban Economics and of Economic Assessment of Urban Transformations, Politecnico di Milano. He has served as President of ERSA (European Regional Science Association), 2003–05, and President of GREMI (Groupe de Recherche Européen

sur les Milieux Innovateurs, Paris) since 1987. He was also Head of the Department for Urban Affairs at the Presidency of the Council of Ministers, Rome, under the Prodi Government, 1997–98, and Vice-President of the Urban Affairs Committee, TDS, OECD, 1998. In 2010 he received the ERSA–European Investment Bank Prize for his scientific contribution to regional and urban economics. He has worked extensively on the ESPON Program of the EU and for DG Regio on Territorial Impact Assessment operational modelling and regional econometric foresight. He has authored a textbook on urban economics, published in Italian, French and Spanish. Department ABC – Architecture, Built environment and Construction Engineering, Politecnico di Milano. Head of the Research Group on Urban and Regional Development and Policies.

Roberta Capello is Professor in Regional and Urban Economics at the Politecnico di Milano. She is a past president of the Regional Science Association International (RSAI); Editor-in-chief of *Papers in Regional Science* and of the *Italian Journal of Regional Science*; and past co-editor of *Letters in Spatial and Resource Science*. She has written many scientific papers and books, among them a textbook in regional economics, published in Italian and English.

Phil Cooke is a hired academic at Oxford Brookes and Cardiff Universities. Currently, he is also adviser to various governments (e.g. EU, Sweden, Finland, Portugal) on the application of complexity theory to regional and national innovation. Since 1992, he has been founding editor of *European Planning Studies*. He recently authored *Complex Adaptive Innovation Systems* (2012) and edited *Reframing Regional Development* (2013). All in all, he has published some 250 articles and chapters. He has further authored or edited 25 books, mostly on various aspects of innovation. He is an honorary doctor at the Universities of Lund, Sweden, and Lappeenranta, Finland.

Teodora Dogaru is a PhD student at A Coruna University, Spain, and researcher at Utrecht University, The Netherlands. She is working on a dissertation on European regional growth, convergence and cross-border cooperation. She is an expert in vocational training projects, regional dynamics and cross-border EU projects.

Marie Ferru holds a PhD and is Assistant Professor in economics. Her research deals with the spatial dimension of the innovation process and the territorial development. She has published around ten papers on the topics of proximity, innovation and regional development. Marie Ferru teaches in various economic fields mainly at the University of Poitiers and also at the Sciences-Po Paris Institute located in Poitiers.

Rune Dahl Fitjar is a Professor of Innovation Research at the University of Stavanger Business School, Norway. He is also associated with the Stavanger Centre for Innovation Research. He holds a PhD in political science from the London School of Economics (2007) and has published a book – *The Rise of Regionalism* (2009) – and 13 journal articles on regionalism, regional development and innovation.

Rachael Gibson is a PhD student at the Department of Political Science at the University of Toronto. The focus of her dissertation is on the role of international trade fairs in enabling inter-firm interaction and knowledge flows across distinct capitalist varieties. Her broader research interests include comparative political economy, economic geography, innovation systems and knowledge-creation, clusters, regional policy, urban politics and governance.

Michel Grossetti is research director at CNRS, in Toulouse. He works on social networks and innovation activities.

Peter Nijkamp is Professor in Regional and Urban Economics and in Economic Geography at the VU University, Amsterdam. His main research interests cover quantitative plan evaluation, regional and urban modelling, multicriteria analysis, transport systems analysis, mathematical systems modelling, technological innovation, entrepreneurship, environmental and resource management and sustainable development. In the past years he has focussed on new quantitative methods for policy analysis and on spatial-behavioural analysis of economic agents. He is past president of the Netherlands Research Council (NWO). In 1996, he was awarded the most prestigious scientific prize in the Netherlands, the Spinoza award.

Frank van Oort is Professor of Urban Economics at Utrecht University, The Netherlands, and research director of the Urban and Regional Research Centre Utrecht. He is Editor-in-chief of the *Journal of Economic and Social Geography (TESG)*, and Editor of *Regional Studies*. Frank van Oort publishes on urban economics, evolutionary economic geography, regional competitiveness in Europe, regional economic growth and knowledge production and diffusion. For more information see www.frankvanoort.com.

Andrés Rodríguez-Pose is Professor of Economic Geography at the London School of Economics, where he was previously Head of the Department of Geography and Environment. He is the current holder of a European Research Council (ERC). He is President-Elect of Regional Science Association International, where he will serve as Vice-President of the Association in 2014 and as President in 2015–16. He is the joint

managing editor of *Environment and Planning C: Government and Policy*, an editor of *Economic Geography* and sits on the editorial board of 20 scholarly journals, including many of the leading international journals in economic geography, human geography and regional science.

Robert J. Stimson is Professor and Director of the Australian Urban Research Infrastructure Network (AURIN) at the University of Melbourne, Australia, and is an Emeritus Professor in Geographical Sciences and Planning at the University of Queensland. He is a former President of the Regional Science Association International, a Fellow of RSAI, a Fellow of the Academy of the Social Sciences in Australia (ASSA), and a former Fulbright Senior Scholar. He is an author of 48 books and more than 350 book chapters and scientific papers. His research interests are in endogenous regional economic development, human spatial behaviour, housing studies, quality of urban life and spatial decision support systems in planning.

Mark Thissen is senior researcher at the Netherlands Environmental Assessment Agency (PBL) in The Hague, The Netherlands. He works on European interregional input–output analyses, regional economic growth and regional competitiveness. He publishes frequently on these subjects in internationally renowned journals.

Emmanouil Tranos is a lecturer at the University of Birmingham. He is an economic geographer focusing primarily on digital geographies and has published on issues related with the spatiality of the Internet infrastructure, the economic impacts that this infrastructure can generate on space and the position of cities within spatial, complex networks. His research in this area led to a monograph, *The Geography of the Internet: cities, regions and Internet infrastructure in Europe* (2013). Recently, he has been researching the use of big, digital data of high spatio-temporal resolution in urban and regional analysis. Regarding research methods, his work combines traditional econometric methods and spatial analysis with tools and concepts from network theory.

Mathijs de Vaan is a PhD candidate at the Department of Sociology of Columbia University. Prior to his affiliation with Columbia University, Mathijs received a PhD in geography from Utrecht University. His current research aims to understand how claims about the risks associated with prescription drugs are constructed and evaluated. By employing a variety of quantitative methods, he sheds light on the relational structure that gives meaning to prescription drugs. His work has been published in international journals such as the *Journal of Economic Geography*.
