structural change
- Akamatsu’s notion of 14, 24
- under American hegemony 40,
  42–5
- under British hegemony 39–42
- driven by innovation 25–6, 118
- as essence of industrialization 54
- historical pattern of 26–8
- MNCs as creature, and instrument, of
  90–103, 118
- stages model for analyzing 59, 68
- structural rigidities 59, 89–90, 92–4,
  118

sub-Saharan Africa
- backlash against China 151–2
- China’s advance into
  evolutionary development of
  132–4
- flying-geese (FG) formation
  138–52
- government-supported
  manufacturing projects
  134–8
- as low-end manufacturing
  transmigration 122–3
- as most promising investor in
  low-cost production 124–5
- sudden rise of 126

China’s economic relations with
121–2
- China’s FDI configurations
  diaspora formation and networking
  131
- lacuna of reliable statistics on
  manufacturing investment
  127–8
- vanguard of 128–30
- follower geese in 141–3
- labor shortages in labor-abundant
  country 144–7
- low level of industrialization 122

Sun, Y. 137, 193
supply chains
- boundary of 33–4
- comparative advantage recycling
  45–7
- cross-border 7, 33, 47–50, 90
- as facilitating industrialization of
  economies 44
- as ‘the second unbundling’ 34
vertical intra-industry trade and monopolistic theory of trade 34–6

Taiwan catch-up growth 122
constrained resources diplomacy 114
developing high-tech industries 114–15
domestic SME development 66
