Director of the Institute Interuniversity for Local Development (IIDL), and Coordinator of Postgraduate Studies in Management and Promotion of Local Development and Postgraduate Development Cooperation.

Markus Grillitsch Consulting expert in regional development and innovation, and researcher at the Institute for Regional Development and the Environment, Vienna University of Economics and Business, Austria. He obtained his doctoral degree at the same university and has been involved in the European Constructing Regional Advantage (CRA) project. He has published several research papers and professional articles in the field.

Eduardo Amaral Haddad Professor in the Department of Economics, FEA/USP São Paulo, Brazil, teaching graduate and postgraduate courses in regional and urban economics and applied general equilibrium. His main research field is in regional analysis, with a special interest in the specification, implementation and application of interregional economic models. He has used these analytical tools for formulating and evaluating economic policies, with particular reference to Brazil. He has also had experience as a consultant for international development agencies such as the World Bank, the Inter-American Development Bank, the OECD, the United Nations (UNDP) and the Joint Africa Institute.

Christoph Höglinger Researcher at the Institute for Regional Development and the Environment, Vienna University of Economics and Business, Austria. He was a team member of the European Constructing Regional Advantage (CRA) project and is currently involved in the European Cluster Life Cycle (CLC) project. He is the co-author of several research and scientific papers on these topics.

João Lourenço Marques Assistant Professor in the Department of Social, Political and Territorial Sciences, University of Aveiro, Portugal, teaching courses in the areas of urban and regional planning (in the field of quantitative methods and techniques to support decision making). In 1998, he joined the Centre for Studies in Innovation and Territorial and Industrial Dynamics (CEI DET) research group. His research activities include: the preparation of regional and local development strategies; the econometric evaluation of environmental policies; and policy studies related to higher education. His current research is focused on GIS (geographic information systems) applications to urban housing policy, in order to study the location patterns of households in urban areas.

Carlos Santos Silva Invited Assistant Professor in Engineering Systems for the MIT Portugal Program (MPP) at the Instituto Superior Técnico (IST), Technical University of Lisbon, Portugal. He coordinates the
