Acknowledgements

The making of this book and the conference, on which it is based, could not have been achieved without the generosity and valuable volunteer work of many people who helped along the way. Firstly, with respect to the conference on Contemporary Capitalism: Its Financial Circuits and Future Prospects, held in Ottawa in May–June 2011, we would like to thank Ronald Bodkin who gave the opening remarks and, as a former Chair of the Economics Department of the University of Ottawa, Canada, introduced Alain Parguez. We wish to thank Robert Prasch and Paul Johanis for presiding over some sessions. We also wish to mention Jamie Galbraith, Joseph Halevi and Olivier Giovannoni who, for personal reasons or conflicting schedules, could not participate in the conference and, in the case of the latter, had to withdraw at the very last minute. We acknowledge the financial support of the Social Sciences and Humanities Research Council (SSHRC) of Canada.

We would like to acknowledge the important contribution of our colleague and friend, Jean-Guy Loranger, distinguished retired Professor from the University of Montreal, Canada, who while having participated in the conference, after a long battle against cancer passed away in October 2012. Jean-Guy and Alain first met in the mid-1980s, and had remained friends through the years. Jean-Guy was admired and appreciated by all of us for his friendly smile and warm heart but also for his intellectual and social commitments, which earned him recognition both in Canada and internationally.

We would also like to thank Orsola Costantini for helping out during the conference, and Alessandro Seccareccia, for videotaping the presentations. Finally, in addition to offering our heartfelt thanks to all the participants who have generously offered their research contributions to this special volume in honour of Alain Parguez, we would like to thank our spouses, Giovanna Mazza for sharing some of the photographs she took of Alain Parguez over the years, and Tyrone Newhook for all the work he did on the photographs and for his broad technical support.
