

# Figures

---

2.1	The production function relating length of stay to the number of nurses	36
2.2	A CBA of a particular intervention	40
2.3	A CM as a CBA	42
2.4	CEA compared to CM	43
2.5	The costs per unit of scale for the HIV-prevention program targeted at CSWs	52
3.1	A competitive market's demand and supply measures $MB$ and $MC$	65
3.2	A competitive firm produces at the lowest point of its $AC$	67
3.3	A monopolist's prices are greater than $MC$	68
4.1	Competitive markets produce too little when a negative externality exists	92
4.2	One hundred percent vaccination may not be optimal	94
4.3	Markets for alcohol and marijuana viewed as substitutes	96
4.4	Markets for alcohol and marijuana viewed as complements	97
4.5	When $MC$ falls, the $MB = MC$ rule may fail to be socially optimal	100
5.1	Modifying the $MB = MC$ rule when taxes exist which cause an MCF to be applied	116
5.2	Calculating the MCF when there are constant costs	120
5.3	Calculating the MCF when demand is perfectly inelastic	121
5.4	Calculating the MCF when the tax rates rise	123
6.1	Average and incremental cost-effectiveness ratios	155
6.2	Ways to estimate the true effect of an intervention	157
6.3	The exponential function depicting the diminishing marginal utility of income	171
7.1	Incremental cost-effectiveness ratios with sampling variation in costs and effects	192
7.2	The cost-effectiveness acceptability curve (CEAC) for the Skilled Care Initiative	198
8.1	The $C/U$ threshold as a point estimate	220
8.2	The $C/U$ threshold as a range of values	221
10.1	The relation between QALYs and DALYs	284
11.1	The trade-off of lifetime income for survival probabilities	319
11.2	The relation between WTP and lifetime earnings	320
11.3	The relationship between age and earnings	330
12.1	Valuing the benefits of health care visits using the travel cost method when multiple visits are involved	343
12.2	Consumer surplus in the presence of addiction	347
12.3	The relation between WTP and WTA	349
12.4	Demand and supply with waiting time as the price	353

12.5	Benefits as a function of time till treatment	356
12.6	Demand and supply as functions of the full price	359
12.7	Demand, government supply and need	361
12.8	Valuing the benefits of health care visits using the travel cost method when a single visit is involved	368
14.1	The benefits and costs of the CSM program in Tanzania	427
