Contributors

Lena Andersson, PhD, holds a postdoctoral position in Business Administration at Linköping University. She is affiliated both to the Department of Management and Engineering and to the Institute for Research on Migration, Ethnicity and Society. Since 2004 she has been engaged in research concerning entrepreneurial organizing processes, mainly in and through the public sector. Her work puts focus on sense-making in cross-sectoral initiatives such as intermediary organizations. In 2010 Lena defended her PhD thesis in which, by means of interactive methods, she portrays struggles involved in organizing between sectors. Currently, Lena is engaged in research regarding ethnic and gender dimensions in public-sector reorganizing.

Karin Berglund, PhD, is Associate Professor at Stockholm University School of Business and Centre Director of Stockholm School of Entrepreneurship. Previously she held a position at Mälardalen University. Her overarching research interest lies in visualizing the suppressed forms, groups and values of entrepreneurship. Karin has published in international journals covering different topics related to entrepreneurship such as gender, education, innovation, critical pedagogy, and regional development and now social/societal entrepreneurship. Her methodological interests lie within ethnography, discourse analysis, narrative research and participatory action research. Before entering academia Karin had a career in the private small business sector, and also took part in starting a new venture.

Carina A. Holmgren is a PhD student at the School of Innovation, Design and Technology at Mälardalen University, and CEO of PEER (Policy Entrepreneurship Evaluation Research). Carina has been engaged in research concerning initiatives in the small business and entrepreneurship policy area since 2003 and is specialized in entrepreneurship education. She has published reports and books concerning entrepreneurship education, competence development in micro firms, entrepreneurship and small business policy and interactive research methods. Her ongoing thesis project concerns the translation of the entrepreneurship concept from policy into Swedish primary and secondary school education practices.
Bengt Johannisson is Professor Emeritus of Entrepreneurship at Linnaeus University and at Jönköping International Business School in Sweden. Between 1998 and 2007 he was editor-in-chief of *Entrepreneurship and Regional Development* and he has published widely on entrepreneurship, personal networking, and family business, as well as on local and regional development. In the 1980s he published pioneering research in community entrepreneurship. More recently Bengt has propagated more responsible and interactive enquiries into entrepreneurship, including enactive research. He has initiated several inter-university networks on research and postgraduate studies in entrepreneurship in Sweden. For 15 years he co-directed the European Doctoral Programme in Entrepreneurship and Small Business Management. Bengt was the 2008 Winner of the Global Award for Entrepreneurship Research.

Anders W. Johansson has been Professor of Entrepreneurship at Linnaeus University since 2008 and Vice Dean of the School of Business and Economics 2010–2012. Previously he was Professor of Entrepreneurship at Mälardalen University. His publications cover core issues of entrepreneurship such as innovation, regional development, family business, advising small businesses, gender issues, narrative approach, and discourse analysis and interactive research methods. In these areas he has supervised a dozen PhD students. His research is based upon a broad view of entrepreneurship as a renewing power in society. Anders had a long career in the private sector as a small business consultant and has been working full time in the non-profit/voluntary sector for several years.

Erik Rosell is a PhD student in entrepreneurship at Linnaeus University. In his thesis he is working with interactive methods to produce close and detailed accounts of entrepreneurial processes as they emerge and develop in the non-profit/voluntary sector. His thesis is based upon a broad view of entrepreneurship that puts focus upon how change and renewal are performed in everyday actions and interactions.

Birgitta Schwartz, PhD, is Associate Professor in Business Administration at Mälardalen University. Her research is about company actions and strategies regarding sustainable development issues like environmental and social responsibility and how companies interplay with other organizations. She has published in the area of environmental strategies, CSR, standardization of environmental and social issues in organizations, Fair Trade, entrepreneurship and social entrepreneurship. She has supervised several doctoral students and is a member of the editorial board of the *Business Strategy and the Environment* journal.
Elisabeth Sundin, PhD, is Professor Emerita in Business Administration and Management at Linköping University. She is also one of the senior research leaders at HELIX VINN Excellence Centre on “Managing Mobility for Learning, Health and Innovation”. Previously she was a professor at the National Institute of Working Life and at Jönköping International Business School. Her research fields and publications include different areas and are now focused on organizational change, especially public sector organizations, described and analysed from the perspectives of SMEs, entrepreneurship and gender. She is also interested in the methods and development of the social sciences.

Malin Tillmar, PhD, is Associate Professor in Business Administration and Deputy Director of HELIX VINN Excellence Centre at Linköping University. Her research focuses on less explored aspects of entrepreneurship, often with an interactive approach. In 2002 she defended her dissertation “Swedish Tribalism and Tanzanian Agency: Preconditions for Trust and Cooperation in a Small Business Context”. Since then she has studied entrepreneurship in the era of public sector transformation and societal entrepreneurship. In 2005 she won the FSF-Nutek prize for young entrepreneurship researchers. Results have been published, for example in Scandinavian Journal of Management, Entrepreneurship and Regional Development and International Journal of Gender and Entrepreneurship.
