

Figures

1.1	The interaction of rapid climate change and habitat fragmentation	7
1.2	Multinational corporations are systems of vision, inputs, throughputs and outputs	11
1.3	Industrial ecosystem at Kalundborg, Denmark	15
1.4	A schematic for thinking about sustainable innovation	17
2.1	The scope of Japan's eco-innovation concept	25
2.2	A proposed framework of eco-innovation	27
2.3	Conceptual relationships between sustainable production and eco-innovation	29
2.4	Diverse types of eco-innovation: incremental to systemic	31
2.5	Mapping primary focuses of eco-innovation examples	37
2.6	Various factors surrounding eco-innovation	41
2.7	Overview of policy instruments for eco-innovation	45
3.1	A new representation of sustainable development	55
3.2	An illustration of the seven core subjects of ISO 26000 standard	61
9.1	Creator profile and sustainable innovation strategy	192
11.1	The three dimensions of a sustainable logistics	221
11.2	The evolution of IWT in France from 1999 to 2009	225
11.3	Types of goods carried by IWT in France	226
12.1	Logistics market volume and functional segments	240
12.2	Sustainable investments in logistics	242
12.3	Stock keeping centralization (Germany)	243
12.4	CO ₂ emissions caused by the electricity mix in Germany	254
12.5	Technology Innovation and Sustainability Assessment in Logistics (TISAL)	257
