

Figures and tables

FIGURES

1.1	GDP per capita in the USA, UK, Japan and eurozone	20
1.2	Median and mean income in the United States	21
1.3	US household wealth	23
1.4	Underlying inflation for the large developed countries	26
1.5	Components of US debt as a percentage of GDP	27
2.1	Real output growth forecasts during the 2007–09 recession	48
2.2	Government spending contributions to GDP growth: 2007–10	57
2.3	The GDP impact of a temporary increase in government transfers of 1 per cent of GDP	59
4.1	Small cycle in a stability corridor and large shock crisis	102
4.2	Krugman's fourth generation crisis	107
5.1	Level of output, investment and consumption	126
5.2	Bandpass-filtered output, investment and consumption	126
5.3	Pooled (year-standardized) capital-goods firms' sales distributions	130
5.4	Pooled (year-standardized) consumption-goods firms' sales distributions	131
5.5	Firms' productivity moments	132
5.6	Investment lumpiness	133
5.7	Empirical distribution of consumption-goods firms' bankruptcy rate together with power-law fit	134
5.8	Fiscal policy experiments	138
6.1	Output gap for the USA, 1960–2008	149
6.2	Frequency distribution of US output gap (1960–2009)	150
6.3	Output gap in behavioural model	159
6.4	Inflation in behavioural model	161
6.5	Correlations between output gap and fraction of optimists	162
6.6	Frequency distribution of simulated output gap	164
6.7	Frequency distribution of simulated animal spirits	165
6.8	Simulated output gap in extended New Keynesian model	167

6.9	Simulated output gap in extended New Keynesian model and autocorrelated errors	168
6.10	Output and inflation variability	171
6.11	Trade-offs in the behavioural model	172
6.12	Constant interest rate vs. variable interest rate	174
6.13	Long-term fiscal policy multipliers: frequency distribution	176
8.1	Mainstream macroeconomics pre-crisis: narrow version	196
8.2	Mainstream macroeconomics pre-crisis: broad version	197
8.3	Mainstream macroeconomics pre-crisis: narrow vs. broad	198
8.4	From the Great Depression to the global financial crisis	199
8.5	USA: percentage of income received by the top 1 per cent of taxpayers	200
8.6	Relative wages in the financial sector and financial deregulation, USA	201
8.7	The wage squeeze in the USA and OECD, 1960–2007	202
8.8	The leverage cycle	204
8.9	The future of macroeconomics	205
8.10	GDP gap	207
8.11	Inflation rate vs. the unemployment rate (%)	210
8.12	Unemployment and inflation rates (1960–2010)	211
8.13	Inflation volatility and real GDP growth volatility (1953–2009)	212
8.14	Simulated inflation with and without supply shocks (1964–2009)	212

TABLES

1.1	Unemployment and economic activity in the crisis of 2008	22
2.1	Models currently available in the database (November 2010)	39
2.2	RMSEs of output growth forecasts initialized with expert nowcasts	50
5.1	Benchmark parameters	125
5.2	Output, investment and consumption statistics	127
5.3	Correlation structure	128
5.4	Schumpeterian regime technological and industrial policy experiments	135
5.5	Keynesian regime fiscal policy experiments	137
5.6	Effects of interest rate for different mark-up rates	140
