
Figures

3.1	Generation adequacy assessment from ENTSO-E SO-AF 2012–2030	50
3.2	Projects of pan-European significance: volume breakdown per EU energy policy pillar	53
7.1	Distribution of energy sources for the production of electricity in 2011 for the Netherlands	134
7.2	Supply chain in an energy system	135
7.3	Simple form of multi-input systems combining fossil energy with renewable energy by blending	139
7.4	Classification of energy systems	139
7.5	Schematic illustration of a multisource multiproduct energy system (or energy hub)	140
7.6	Schematic representation of the Superwind concept	142
8.1	Major methodological choices in measuring energy security and the energy systems approach	148
8.2	Vital energy systems covered in the GEA	153
8.3	Aggregate analysis of energy security in future energy scenarios using a two-dimensional plotting	165
8.4	Energy security assessment framework	168
9.1	Russia's primary energy consumption by fuel as a percentage of total consumption	188
9.2	Energy mix outlook for the EU 2030 and 2050	196
9.3	U.S. primary energy consumption by fuel (quadrillion btu per year)	197
16.1	Airborne pollutant emissions from fossil fuel fired power plants	348
16.2	Lifecycle GHG emissions of electricity generation technologies disaggregated by life cycle stage	371
16.3	Lifecycle NO _x and SO ₂ emissions of electricity generation technologies	372
16.4	Lifecycle particulate and NMVOC emissions of electricity generation technologies	373
16.5	Lifecycle GHG emissions of bioethanol production from different raw materials	375
16.6	Lifecycle GHG emissions of biodiesel production from different raw materials	376

16.7	External costs of electricity generation technologies disaggregated by impact category	377
16.8	External costs of electricity generation technologies disaggregated by life cycle stage	378
18.1	Climate governance versus energy governance	414
18.2	Climate/energy governance versus social acceptability	415
19.1	Major concentration of population without access to electricity in 2009	429
19.2	Urban-rural electricity access disparity in major concentrations in 2009	430
19.3	Ten least electrified countries in the world in 2009	430
19.4	Distribution of lack of cooking energy access in the world in 2009	431
19.5	Share of different cooking fuels in developing countries in 2007	432
19.6	Regional distribution of countries with targets for electricity and clean cooking energy access	434
19.7	Energy access improves with per capita income	435
19.8	HDI and electricity access	436
19.9	HDI and cooking energy access	436
19.10	Life expectancy at birth and cooking energy access	437
19.11	Mean schooling years against electricity access	437
19.12	Intervention options for reducing health impacts of solid fuel use	440
21.1	Number of people without electricity (actual and projected) by region under current policies	465
