

Tables

1.1	Double dividend from an energy tax in Spain	7
1.2	Welfare impacts (% equivalent variation)	11
1.3	Economic impacts of different tax reforms ($\sigma_L = 5$ and $\theta = 0.1$)	12
2.1	Allocation of resources within the environmental framework of Structural and Cohesion Funds and share of funding in percentage, 2007–2013	23
3.1	Fiscal structure in Italy and Europe	39
3.2	Local revenue raising environmental taxes in Italy	42
3.3	Local special fees and earmarked taxes in Italy	43
4.1	Design framework for integrated and independent environmental tax	62
6.1	Australian tax lives for gas capital assets	95
9.1	Energy production of electricity, CO ₂ emissions and EUA in Spain (2008)	139
9.2	Compensations for windfall profits arising from free EUAs and implicit EUA prices (Spain, 2008)	141
9.3	Increase of electricity generation costs due to compensations to be paid for windfall profits from free EUAs (Spain, 2008)	142
10.1	J-VETS implementation results (as of May, 2011)	152
10.2	Performance of participants in Japan's domestic ETS trial for 2009	153
10.3	Outline of Japan's intermediate GHG ETS proposal	155
10.4	Disagreements with Korea's preliminary GHG ETS proposal	160
11.1	Design recommendations for sustainable carbon markets	181
13.1	Public awareness of environment quality and CO ₂ emissions per capita	204
13.2	Descriptive statistics for all variables	211
13.3	Logistic model of determinants of willingness to pay for emissions reduction	214
14.1	Energy/carbon tax rates (SEK)	223
14.2	Development of carbon tax revenue (SEK million)	224
14.3	Basic descriptive statistics (SEK thousand)	226
14.4	Estimated results	227
