Thomas Andersson is Professor of Economics and Senior Advisor on Science, Technology and Innovation Policy at the Research Council, Sultanate of Oman. Prior to his current position, Thomas Andersson was President of Jonkoping University in Sweden. Among other assignments, he is President of the Board for the International Organization for Knowledge Economy and Enterprise Development (IKED) and Chairman of the International Entrepreneurship Academy (intentac). He previously served as Deputy Director of Science, Technology and Industry at the OECD and was Assistant Under-Secretary and Head of the Structural Policies Secretariat of the Ministry of Industry and Commerce in Sweden.

Robert D. Atkinson is Founder and President of the Information Technology and Innovation Foundation, Washington, DC, USA. Before coming to ITIF, Dr Atkinson was Vice President of the Progressive Policy Institute and Director of PPI’s Technology and New Economy Project, where he wrote numerous research reports on technology and innovation policy, including on issues such as broadband telecommunications, e-commerce and e-government, and privacy. Previously he served as the first Executive Director of the Rhode Island Economic Policy Council, where he drafted a comprehensive economic strategic development plan for the state, and worked successfully through the legislative and administrative branches to implement it. He is also author of the book Innovation Economics: The Race for Global Advantage (Yale University Press, 2012).

David B. Audretsch is Distinguished Professor and Ameritech Chair of Economic Development, Director, Institute for Development Strategies and Director, SPEA Overseas Education Program, School of Public and Environmental Affairs, Indiana University, Bloomington, Indiana, USA. Professor Audretsch is also an Honorary Professor of Entrepreneurship and Industrial Economics at the WHU – Otto Beisheim School of Management in Vallendar, Germany. In addition, he serves as a Visiting Professor at the King Saud University in Saudi Arabia and as a Research Professor at Durham University, an External Director of Research at the Kiel Institute for the World Economics, and Honorary Professor at the Friedrich Schiller University of Jena in Germany, and is a Research
Fellow of the Centre for Economic Policy Research in London. Professor Audretsch’s research has focused on the links between entrepreneurship, government policy, innovation, economic development and global competitiveness. His research has been published in over one hundred scholarly articles in the leading academic journals. He is co-founder and co-editor of *Small Business Economics: An Entrepreneurship Journal*.

Shiri M. Breznitz is Assistant Professor in the School of Public Policy at Georgia Institute of Technology, Atlanta, Georgia, USA. Professor Breznitz is an economic geographer by training and has two main research streams. The first focuses on the role of the university as a regional and national actor. The second stream involves industrial clusters; in particular, biotechnology industrial clusters and their local economic impacts. Dr Breznitz sat on national committees in both Israel (2008) and France (2005) to review industrial and economic development policy. She is affiliated with the MIT’s Industrial Performance Center, and a founding member of the Industry Studies Association.

Dennis P. Leyden is Associate Professor of Economics in the Bryan School of Business and Economics at the University of North Carolina at Greensboro, North Carolina, USA. He received his BA with High Honors in Economics from the University of Virginia and his MS and PhD from Carnegie Mellon University. His current research focuses on the role and behavior of universities in furthering entrepreneurial activity, innovation, and economic development. In addition to prior work on R&D policy, he has a background in bureaucracy, legislative and court behavior, and the public funding of education. His books include *Adequacy, Accountability, and the Future of Public Education Funding* (2005) and *Government’s Role in Innovation* (1992, with Albert N. Link). Recent conferences at which he has presented include ‘Universities, Innovation, and Territory’ (University of Barcelona), ‘Science and Technology Research in a Knowledge-based Economy’ (University of Turin), and ‘Academic Policy and the Knowledge Theory of Entrepreneurship’ (University of Augsburg). In the classroom, he is currently involved in a project to revise the structure and content of principles of economics courses to include explicit instruction in the mechanics of critical thinking using his text *Critical Thinking in Economics* (second edition, 2012) and to emphasize the role of knowledge creation in microeconomic and macroeconomic behavior.

Albert N. Link is Professor of Economics at the University of North Carolina, Greensboro, North Carolina, USA. Professor Link is an internationally recognized scholar in the field of economics of research and development. A long-time member of the UNC Greensboro faculty,
Contributors

he previously directed the university’s MBA program and headed the Economics department. He also directed both the Industrial Technology and Computer Technology Education programs at UNC Greensboro. He has taught at Auburn University and was Visiting Scholar at the Maxwell School, Syracuse University, New York, USA.

Gerald A. McDermott is Associate Professor in the Sonoco International Business Department in the Moore School of Business at the University of South Carolina, USA and Senior Research Fellow at the IAE Business School of the Universidad Austral in Buenos Aires, Argentina. Professor McDermott specializes in international business and political economy. His first research stream focused on the impact of industrial networks on the creation of economic governance institutions in post-communist countries. His current research in South America uses both comparative and statistical survey methods to examine the socio-political conditions under which societies build new innovative capacities to achieve sustained upgrading in their industries. He has also recently launched a project about the impact of international integration regimes on local institutional development via a comparison of the EU accession, NAFTA, and Mercosur.

Neela Ram received her BS degree in Biology from Emory University and earned an MS in Public Policy and a Master’s in City and Regional Planning from Georgia Tech, Atlanta, Georgia, USA, with specializations in urban development and policy and environmental planning. She has several years’ experience in both the environmental and economic development fields. She currently works on water supply and water conservation planning issues for the Atlanta Region.

Sujai Shivakumar serves as a Senior Policy Advisor at the National Academies’ Board on Science, Technology, and Economic Policy. Since joining the NAS in 2001, he has been a lead researcher in the Academies’ evaluation of public–private technology partnerships and its multi-part analysis of the drivers of the information technology-led productivity growth. He was also a leading member of a research team assembled by the National Academies to study the US Small Business Innovation Research program. Currently, he is helping to lead the Academies’ comparative review of national innovation policies around the world as well as its review of best practices in innovation policies among US states, and is leading the National Academies’ study of best practices in national innovation programs to support flexible electronics. Dr Shivakumar’s analysis highlights the important role of institutions in fostering successful cooperation among small and large technology firms, universities, venture capital companies and other actors needed to commercialize new technologies.

**Abraham J. Shragge** received his PhD in Modern United States History from the University of California, San Diego (UCSD), USA in 1998. His dissertation, ‘Boosters and Bluejackets: The Civic Culture of Militarism in San Diego, California, 1900–1945’, has been cited by numerous urban and naval historians. Dr Shragge has taught History and Urban Studies and Planning at UCSD as well as at Korea University’s International Summer Campus. He directed the Dimensions of Culture Program at UCSD’s Thurgood Marshall College, where he also created courses in Civil Society and Public Service. He is curator of the Veterans Museum and Memorial Center in Balboa Park, and coordinator of the San Diego Ex-Prisoners of War Oral History Project. He is currently a Visiting Professor at the Korea Development Institute School of Public Policy and Management.

**Donald S. Siegel** is Dean of the School of Business and Professor of Management at the University of Albany, SUNY, USA. Professor Siegel’s research has focused on university technology transfer and academic entrepreneurship, the economic and strategic implications of entrepreneurship and technological change; productivity analysis, private equity and corporate governance; and corporate social responsibility. He is editor of the *Journal of Technology Transfer*, co-editor of *Academy of Management Perspectives*, an associate editor of the *Journal of Productivity Analysis*, and serves on the editorial boards of *Academy of Management Learning & Education*, *Journal of Management Studies*, *Journal of Business Venturing*, *Corporate Governance: An International Review*, and *Strategic Management Journal*. He has also co-edited 32 special issues of leading journals in economics, management and finance. Dr Siegel has taught at SUNY-Stony Brook, Arizona State University, the University of Nottingham, Rensselaer Polytechnic Institute, and the University of California – Riverside, where he served as Associate Dean for Graduate Studies.

**Mary Lindenstein Walshok** is Associate Vice Chancellor, Public Programs, Dean, University Extension and Adjunct Professor, Sociology at the
University of California, San Diego, California, USA. Professor Walshok is a thought leader on aligning workforce development with regional economic growth and innovation. As an industrial sociologist, she has been researching various American regions for the US Department of Labor, NSF, and Lilly Foundation. One of her current research projects is an NSF-funded study of the role of boundary-spanning organizations in shaping the social and cultural dynamics of the highly innovative regions. She is the author of *Blue Collar Women, Knowledge Without Boundaries, Closing America’s Job Gap* and forthcoming at Stanford University Press *Invention and Reinvention: The Evolution of San Diego’s Entrepreneurial Economy*. Professor Walshok is also a co-founder of CONNECT, one of the most admired innovation cluster development organizations in the world.

**Charles W. Wessner** is Director of the Program on Technology, Innovation and Entrepreneurship at the National Academy of Sciences, Washington, DC, USA. He is recognized nationally and internationally for his expertise on innovation policy, including public–private partnerships, entrepreneurship, early-stage financing for new firms, and the special needs and benefits of high-technology industry. He testifies to the US Congress and major national commissions, advises agencies of the US government and international organizations, and lectures at major universities in the US and abroad. Reflecting the strong global interest in innovation, he frequently addresses issues of shared policy interest with foreign governments, universities, and research institutes. He has a strong commitment to international cooperation, reflected in his work with a wide variety of countries around the world.

**David A. Wolfe** is Royal Bank Chair in Public and Economic Policy and Professor of Political Science at the University of Toronto and Director of the Program on Globalization and Regional Innovation Systems (PROGRIS) at the Munk School of Global Affairs, Toronto, Ontario, Canada. Professor Wolfe’s research interests include the political economy of technological change and the role of local and regional economic development, with special reference to Canada and Ontario. At PROGRIS, he is National Coordinator of the Innovation Systems Research Network (ISRN), funded by the Social Sciences and Humanities Research Council of Canada. There he has served as principal investigator on two major collaborative research initiatives, including ‘Innovation Systems and Economic Development: The Role of Local and Regional Clusters in Canada’, and currently on the ‘Social Dynamics of Economic Performance: Innovation and Creativity in City Regions’. He is the editor or co-editor of nine books and numerous scholarly articles.
