

# List of figures

---

1.1	The environmental Kuznets curve	6
2.1	Concentrations of greenhouse gases from 0 to 2005	31
2.2	Three main considerations concerning global anthropogenic GHG emissions	32
2.3	Sea level rise	40
4.1	800,000-year record of carbon dioxide concentration	183
5.1	Top 25 of largest CO <sub>2</sub> -emitting countries in 2009	250
5.2	Top 12 CO <sub>2</sub> -emitting countries and their per capita emissions (2004)	251
5.3	CO <sub>2</sub> emissions from Energy Use Index 2011	252
5.4	U.S. energy appetite: though the mix of fuels has changed, the appetite for energy from the U.S. has grown steadily in the past 100 years	253
5.5	Total aggregate GHG emissions of individual Annex I Parties between 1990 and 2008	255
5.6	Top policy priorities for 2011	262
5.7	Projected emissions of GHGs in 2025	266
5.8	Per capita CO <sub>2</sub> emissions 1980–2004	270
5.9	Contributions to global warming	272
5.10	Per capita CO <sub>2</sub> emissions for select major emitters, 2007 and 2030 (projected)	273
5.11	China's percentage share of global coal consumption	278
5.12	EU GHG emissions towards an 80 per cent domestic reduction (100% = 1990)	283
5.13	Projected EU GHG emissions growth: transport v. non-transport sector	283
6.1	GHG emissions growth	297
6.2	Total CO <sub>2</sub> emissions from fossil fuel burning, cement production, and gas flaring	298
6.3	Aggregate contributions of major GHG emitting countries: 2005	299
6.4	A graphical map of the climate change regime complex	312
7.1	Evolution of RTAs in the world (1948–2009)	366
7.2	Share of international trade occurring under RTAs	367

7.3	Participation in RTAs in force, as of March 2002	381
7.4	The EU's RTAs	382
7.5	APEC Members' RTAs in force, under negotiation or proposal, as of October 2003	384
7.6	Cross-regional RTAs recently concluded or under negotiation (2003)	385
7.7	The spaghetti bowl phenomenon (February 2005)	393
9.1	Arctic sea ice volume	468
9.2	Average monthly Arctic sea ice extent, January 1979 to 2011	469
9.3	Conservation's measure	470
