Introduction	1
<b>PART I UNDERSTANDING THE ECONOMICS OF CLIMATE CHANGE, POLICY IMPLEMENTATION AND PUBLIC PERCEPTIONS</b>	
1 The carbon tax: early experience and future prospects	7
<i>Ross Garnaut</i>	
2 Carbon pricing in Australia: an early view from the inside	25
<i>Daniel Besley, Christian Downie, Steven Kennedy and Simon Writer</i>	
3 How has the carbon tax affected the public ‘debate’ on climate change?	49
<i>John Cook</i>	
<b>PART II TAXING EXTERNALITIES</b>	
4 The carbon tax and tax reform debate	67
<i>John Freebairn</i>	
5 How I learned to stop worrying and love the RET	89
<i>John Quiggin</i>	

**PART III THREATS, OPPORTUNITIES AND INDUSTRY  
ADAPTATION AND ADJUSTMENT**

- 6 The impact of carbon prices on Australia's National  
Electricity Market 101  
*Phillip Wild, William Paul Bell and John Foster*
- 7 Modeling the impact of the Australian greenhouse  
emissions trading scheme on farm and fishery businesses 123  
*Mick Keogh*
- 8 Science, transaction costs and carbon markets 136  
*Michael Battaglia and Rohan Nelson*
- 9 Agricultural adaptation: observations and insights 145  
*Thilak Mallawaarachchi and Michael Harris*

**PART IV DEALING WITH THE UNCERTAIN FUTURE**

- 10 Climate change and the precautionary principle 167  
*Simon Grant and John Quiggin*
- Conclusion 179
- Index* 181
