

Tables

2.1	Liability management arrangements in Australia's emissions trading scheme	34
2.2	Key public engagements on the emissions trading scheme	36
4.1	Australia's carbon pollution profile, 2009, and carbon tax base	69
4.2	Effective marginal tax rate (for statutory income tax schedule, low-income tax offset and indirect tax on disposable income), 2011–2012 and 2012–2013 in cents per dollar	79
6.1	Percentage change in state aggregate production from BAU: 2007–2009 average results	105
6.2	Percentage change in aggregate production from BAU for coal generation: 2007–2009 average results	105
6.3	Percentage change in aggregate production from BAU for gas generation: 2007–2009 average results	106
6.4	Percentage change in aggregate production from BAU for hydro generation: 2007–2009 average results	106
6.5	Average MW power flows: inter-state interconnectors: 2007–2009 average results	112
6.6	Percentage change in aggregate carbon emissions from BAU: 2007–2009 average results	116
6.7	Percentage change in carbon emissions from BAU for coal generation: 2007–2009 average results	117
6.8	Percentage change in carbon emissions from BAU for gas generation: 2007–2009 average results	118
7.1	Results of Australian Treasury modeling of the impact of the ETS on the Australian agriculture sectors	125
7.2	Sources of case-study data used in model development	127
7.3	Estimated increase in processor costs arising from the ETS	128
7.4	Business revenue and costs for case-study businesses, and significance of energy-related costs as a percent of total business costs	130
7.5	Changes in business and supply chain costs arising from the ETS, compared to a business-as-usual scenario	132
