Contributors

Gilberto Aboites is Professor at the Center of Socioeconomic Research at the Autonomous University of Coahuila and in the Department of Agricultural Economics at Antonio Narro Autonomous Agrarian University, Mexico. He is the author of numerous refereed publications that have appeared in Spanish and English.

Carmen Bain is Associate Professor in the Department of Sociology at Iowa State University, USA. Her research interests include the political economy of food and agriculture; the socio-political dimensions of biotechnology as it relates to food and agriculture; and gender, social change and development. Her current research focuses on understanding and analyzing societal acceptance and governance issues related to genetically engineered foods, especially as it relates to labeling. She has conducted research in Chile, Ghana, New Zealand, Uganda and the United States. Her work has been published in the journals *Agriculture and Human Values*, *Biomass and Bioenergy*, *Food Policy*, *Gender and Society*, *International Journal of Sociology of Agriculture and Food*, *Rural Sociology* and *Signs: Journal of Women in Culture and Society* and several edited volumes including *Gendered Commodity Chains: Bringing Households and Women into Global Commodity Chain Analysis*, *Rural America in a Globalizing World: Problems and Prospects for the 2010s*, *Sustainable Development of Biofuels in Latin America and the Caribbean*, *Calculating the Social: Standards and the Re-configuration of Governing and Agricultural Governance: Globalization and the New Politics of Regulation*.

Josefa Salete Barbosa Cavalcanti is Researcher of the Brazilian CNPq and Professor of Sociology and Anthropology at the Federal University of Pernambuco, Brazil. She has a PhD from the University of Manchester, UK. She is the author of numerous publications that have appeared in English, Portuguese and Spanish and the co-author with Alessandro Bonanno of *Labor Relations in Global Agri-food* (2014) and *Globalization and the Time–Space Reorganization* (2011).

Manuel Belo Moreira is an Agronomist and Professor at the Instituto Superior de Agronomia, University of Lisbon, Portugal, from where he retired in 2012. He holds a PhD in economics from the University of Grenoble (France) and was on the staff at the Portuguese Ministry of Agriculture during the 1975 land reform process. He has published
numerous books, refereed articles and book chapters that have appeared in English, Portuguese and other major languages. He organized domestic and international conferences such as the International Rural Sociological Association World Congress of Rural Sociology, which was held in Lisbon in 2012 and co-edited various issues of the *International Journal of Sociology of Agriculture and Food (IJSAF)*. He served on the advisory board of the journals *Sociologia Ruralis* and *IJSAF*, on a number of European Commission technical teams appointed to assess EU legislation and as President of the International Sociological Association’s Research Committee on Sociology of Agriculture and Food (RC-40) (2002–2006).

**Bettina Bock** is Associate Professor of Rural Sociology in the Department of Social Science at Wageningen University, the Netherlands. She holds a PhD in rural sociology based on a study of gender and rural development policy and practice defended in 2002. She teaches social theory, sustainable development, food policy and health and supervises PhDs in the field of gender and rural development, sustainable food and animal welfare policy. She is editor in chief of *Sociologia Ruralis* and has been a board member of the European and International Society for Rural Sociology (ESRS and IRSA). Her research projects include farm animal welfare, rural development and social innovation, and rural gender relations, as well as sustainable food consumption and production. Recently she has coordinated the EU funded project FOODLINKS, which aims to develop new modalities of linking research to policy making in the field of sustainable food consumption and production. She has also been a member of the coordinating team of EUWElNet, an interdisciplinary (EU funded) study of implementation of farm animal welfare legislation across Europe. She has published on social equality, rural gender issues, rural development governance and animal welfare policies in a number of international journals.

**Alessandro Bonanno** is Texas State University System Regents’ Professor and Distinguished Professor of Sociology at Sam Houston State University, USA. His research focuses on the globalization of the economy and society with particular emphasis on agri-food. His most recent books discuss labor relations in agri-food and the crisis of neoliberalism.

**Barbara Brandl** is a PhD candidate in the Department of Sociology at the University of Munich (LMU), Germany. During the 2012–2014 academic year she was a visiting scholar in the Department of Agricultural Economics, Sociology, and Education at Penn State University, USA. Her doctoral research is in the field of the institutional embedding of seed systems in the United States and Germany.
Lawrence Busch is University Distinguished Professor of Sociology at Michigan State University, USA, and a recent visiting scholar at CIRAD, Montpellier, France. His research interests include the growing role of formal standards in neoliberal governance globally, with particular concern for agri-food, and higher education and research. His most recent book addresses neoliberal notions of knowledge: *Le Marché aux Connaissances* (Éditions Quea, 2014).

Clara Craviotti is Researcher at the National Council of Scientific and Technological Research (CONICET), Argentina and is a Principal Teaching Fellow at the Master’s of Agrarian Social Studies Program of the Latin American Faculty of Social Sciences (FLACSO), Argentina. She holds a degree in sociology, a Master’s degree in social studies and a PhD in geography. Her main areas of research are the new profiles of family farming and enterprise agriculture and the dynamics of delocalization and relocalization in food production and its impacts on rural spaces and agrarian structures. She has recently edited and co-authored *Agricultura familiar en Latinoamérica. Continuidades, transformaciones y controversias* (Buenos Aires: Ed. CICCUS, 2014) and *Tramas productivas y agentes sociales en la fruticultura globalizada* (Buenos Aires: Miño y Dávila, 2012). Some of her recent articles are: Craviotti, Clara, “Agricultura familiar-agronegocios: Disputas, interrelaciones y proyectos,” *Territorios*, no. 30 (2014); Craviotti, Clara and Paula Palacios, “La diversificación de los mercados como estrategia de la agricultura familiar,” *Revista Brasileira de Sociologia e Economía Rural*, vol. 51, suppl. 1, S063–S078 (2013); Craviotti, Clara “Producer Relationships and Local Development in Fresh Fruit Commodity Chains: An Analysis of Blueberry Production in Entre Ríos, Argentina,” *Regional Studies*, vol. 46, no. 2, pp. 203–215 (2012).

Ivan Cucco is a postdoctoral research fellow in the Department of Economics and Statistics at the University of Naples Federico II, Italy. His current research project brings theoretical and methodological insights from social network analysis to the field of innovation studies. Dr. Cucco obtained his PhD in 2012 at Macquarie University with a neo-Marxist class analysis of inequality in a Chinese New- and High-Technology Development Zone. Beyond innovation and inequality, his research interests include rural development, the transformation of global food regimes and the political economy of alternative food networks. He spent several years doing fieldwork in rural and urban areas of China and Vietnam.

Tamera Dandachi is a graduate student in the sociology department at Iowa State University, USA. She completed her BA in sociology and anthropology at the University of Michigan-Flint. Her research interests
are the political economy of agri-food systems, food production and distribution, social movements, and gender, class and race inequalities.

**María del Rosario Castro Bernardini** is a first year graduate student in rural sociology in the Department of Agricultural Economics, Sociology and Education at Penn State University, USA.

**Jane Dixon** is Senior Fellow at the National Centre for Epidemiology and Population Health, Australian National University, Australia. Her research takes place at the intersection of sociology and public health, with a focus on the cultural, social and health impacts of food system transformations. She has advised numerous bodies on adopting a food system perspective, including the International Union on Health Promotion and Education and WHO Western Pacific Regional Office. Recent books include *When Culture Impacts Health* (Elsevier) and *Weight of Modernity* (Springer). In agri-food studies, she has written on the cultural economy of poultry commodity systems, the nutrition relations which underpin food regimes and the exercise of authority by supermarkets. She is currently researching for a new book, *The Culinary Footprint* (Bloomsbury), which examines how consumer demand shapes food security.

**Miren Etxezarreta** holds a PhD in economics from the London School of Economics, UK. She is Professor Emeritus of Applied Economics at the Autonomous University of Barcelona, Spain and has researched and published in agricultural economics and rural development, development economics and economic policy.

**Madeleine Fairbairn** earned a PhD from the joint Sociology/Community and Environmental Sociology graduate program at the University of Wisconsin-Madison, USA, in 2014 and is now a postdoctoral fellow at Goucher College, USA. Her work explores transformation in the global agri-food system through the lens of political ecology. Her previous research projects have focused on the global food sovereignty movement and on land concessions to foreign investors in Mozambique. Her current work explores growing interest in farmland on the part of the financial sector, as well as the policy debate that surrounds foreign farmland investment in Brazil. Her work has been published in *Development and Change, Agriculture and Human Values* and the *Journal of Peasant Studies*.

**Maria Fonte** is Associate Professor of Agricultural Economics in the Department of Economics, Management and Institutions at the University of Naples Federico II, Italy. Her teaching and research topics include political economy of agriculture, rural development, local agriculture, knowledge systems and local knowledge, agri-food systems, territo-
rial development and biocultural diversity, agricultural innovation and biotechnology. Her recent publications include numerous articles on rural development and civic food networks in Italy and the volume Naming Food after Places: Knowledge Dynamics in Rural Development, co-edited with Apostolos G. Papadopoulos.

**Leland Glenna** is an Associate Professor of Rural Sociology and Science, Technology, and Society in the Agricultural Economics, Sociology, and Education Department at Penn State University, USA. His research interests are in the areas of social and environmental impacts of agricultural science and technologies, the role of science and technology in agricultural and natural resource policy making, and the social and ethical implications of democratizing science and technology research.

**Lummina Horlings** is Associate Professor of Rural Sociology in the Department of Social Science at Wageningen University, the Netherlands. She has studied human geography and holds a PhD in policy sciences, based on a study of innovative farmers groups and the role of national policy, defended in 1996. She teaches in sustainability leadership, sociological theories of rural transformation, place-based development and sociology of food and place, and she supervises PhDs. Her research deals with the question of how people contribute to sustainable place-shaping, including aspects such as leadership, self-organization, coalitions, values and sense of place. She has also published on these issues and on sustainable food production in international journals. She is involved in several European networks such as the RSA research network on “The Place of Leadership in Urban and Regional Development,” the Interreg IVB project on “Rural Alliances” and the COST Action “Investigating Cultural Sustainability.”

**Kristal Jones** holds a PhD in Rural Sociology and International Agriculture and Development from Penn State University, USA, where she currently is a postdoctoral scholar. Her research focuses on agricultural development, with a specific emphasis on Francophone West Africa and seed systems.

**Evander Eloï Krone** holds a Master’s degree in anthropology and is currently completing his doctorate degree in anthropology at the Federal University of Pernambuco, Brazil.

**Geoffrey Lawrence** is Emeritus Professor of Sociology at the University of Queensland, Australia. His current research examines the financialization of food and agriculture, the political economy of supermarkets and agri-food supply chains, and the causes and contours of food security/insecurity. He is the author/co-author/editor of some 30 books and 500
journal articles and book chapters. He is President of the International Rural Sociology Association (2012–2016) and is an elected Fellow of the Academy of Social Sciences in Australia.

**Francisco Martínez** is Professor at the Center of Socioeconomic Research at the Autonomous University of Coahuila and in the Department of Agricultural Economics at Antonio Narro Autonomous Agrarian University, Mexico. Dr Martínez’s work focuses on globalization of the economy and society; plant genetic resources and rural development; and globalization and the poultry industry. Dr Martínez is the author of numerous publications that have appeared in Spanish and English.

**Mara Miele** is Reader in Human Geography in the Cardiff School of Planning and Geography at Cardiff University, UK. Her research addresses the geographies of ethical foods consumption and the role of animal welfare science and technology in challenging the way farmed animals are used in current agricultural practices and policies. Over the last decade, Dr. Miele has worked with a large interdisciplinary network of social and animal welfare scientists to develop innovative forms of critical public engagement with animal production and animal welfare science. She was the coordinator of the EU project Dialrel (2006–2010), which was dedicated to establishing a dialogue between religious authorities and scientists about the welfare of animals in practices of religious slaughter, and a member of the steering committee of the EU funded project Welfare Quality (2004–2009), which was dedicated to developing standardized protocols for monitoring and assessing animal welfare on farms and in slaughterhouses. In 2012 Dr. Miele received the Ashby prize for her 2011 article “The Taste of Happiness: Free Range Chicken,” published in *Environment and Planning A*, 43 (9): 2070–2090.

**Gerardo Otero** is Professor of Sociology and International Studies at Simon Fraser University, Canada. Author of *Farewell to the Peasantry? Political Class Formation in Rural Mexico* (Westview, 1999), he has published numerous scholarly articles, chapters and books about political economy of agriculture and food, civil society and the state in Mexico and Latin America. His latest edited book is *Food for the Few: Neoliberal Globalism and Biotechnology in Latin America* (University of Texas Press, 2008, reissued in paperback in 2010), which was published in a revised and updated version in Spanish as *La dieta neoliberal: Globalización y biotecnología agrícola en las Américas*, co-published in Mexico by Simon Fraser University, Universidad Autónoma Metropolitana-Xochimilco and M.A. Porrúa. During Fall of 2014, Otero was Tinker Visiting Professor at the University of Wisconsin-
Madison, affiliated to the Department of Community and Environmental Sociology.

Anouk Patel-Campillo is Assistant Professor in the Department of Agricultural Economics, Sociology and Education at Penn State University, USA. From a critical development studies perspective, Dr. Patel-Campillo’s research examines the socio-economic and political processes and impacts of agri-food system restructuring at the local, national and international scales and across distinct institutional and developmental contexts. Her research program falls within three broadly defined areas: (1) the investigation of agri-food systems restructuring and its impacts on workers, communities, regional food security and national development; (2) the examination of organization, structure and competitive position of value-added chains across scale, space and time; and (3) the analysis of the role of geopolitics, the state, regulation, civil society and production–consumption relations related to the practices of economic actors in value-added chains.

Gabriela Pechlaner is the author of Corporate Crops: Biotechnology, Agriculture, and the Struggle for Control, published by the University of Texas Press in December 2012, reissued in paperback in December 2013. Her research focuses on the sociology of agriculture and food, with a particular emphasis on the legal and regulatory aspects of new technologies. She has published a number of solo and co-authored articles in this and related areas in scholarly journals such as Anthropologica, International Journal of the Sociology of Agriculture and Food, Rural Sociology, Sociologia Ruralis and Canadian Journal of Sociology. She has also contributed to a number of chapters in edited volumes, such as the Routledge Handbook of Poverty in the United States (Routledge, 2014), and Seeing Ourselves: Classic, Contemporary, and Cross-Cultural Readings in Sociology (Pearson, 2013). Pechlaner is a permanent faculty member in sociology at the University of the Fraser Valley, Canada.

Elizabeth Ransom is an Associate Professor of Sociology at the University of Richmond, USA. Her primary research interests are in international development and globalization, agriculture and food systems with an emphasis on Southern Africa, and science and technology studies especially in relation to agriculture and food. She has two ongoing research programs. The first program focuses on the linkages between Southern African (South Africa, Botswana and Namibia) red meat industries and global food systems. The second program analyzes international agricultural development assistance in developing countries with an
emphasis on the ways in which agricultural assistance targets women and focuses on gender empowerment.

**Jordi Rosell** holds a PhD in economics and is Senior Lecturer in Applied Economics at the Autonomous University of Barcelona, Spain. Dr. Rosell’s primary areas of investigation are rural development, the Common Agricultural Policy and world and Latin American economics.

**Carolyn Sachs** is Professor of Rural Sociology at Penn State University, USA. Dr. Sachs’ research examines issues of gender and agriculture and gender and environmental issues. In particular she studies the new women agricultural entrepreneurs and the opportunities and barriers to success. She is engaged in a comparative international project on gender and climate change in India in collaboration with the Food and Agriculture Organization. Dr. Sachs also focuses on gender and the food system, exploring gendered work in the food system from farm to table.

**Kae Sekine** is Lecturer of Rural Economics at Aichi Gakuin University, Japan. She holds a PhD (2011) in economics from Kyoto University, Japan, and studied at the French National Institute for Agricultural Research (INRA) in Montpellier, France, from 2007 to 2010. Dr. Sekine has researched transnational agri-food corporations and the consequences of, and reactions to, their actions in rural society. Her current research focuses on adoption of, and resistances to, neoliberal policies in agri-food.

**Lourdes Viladomiu** holds a PhD in economics and is Senior Lecturer in Applied Economics at the Autonomous University of Barcelona, Spain. Her primary areas of expertise are rural development, the Common Agricultural Policy, development economics and Latin American economics.
