## Figures

1.1 The empirical cycle  \hspace{1.5cm} 15
2.1 The roots of empirical legal research  \hspace{1.5cm} 37
3.1 Development of civil cases in the Netherlands in total numbers (1992–2012)  \hspace{1.5cm} 50
4.1 Coleman’s Boat: a model linking micro and macro-conditions and mechanisms  \hspace{1.5cm} 60
4.2 The basics of Megan’s Law’s program theory  \hspace{1.5cm} 69
4.3 A model of mechanisms underlying ‘naming and shaming’ of sex offenders. A = situational mechanism; B = action-formation mechanism and C = transformational mechanism  \hspace{1.5cm} 69
4.4 Reconstruction of the underlying intervention theory of the anticorruption World Bank Institute program on workshops  \hspace{1.5cm} 73
7.1 Examples of databases in the Dutch criminal law chain  \hspace{1.5cm} 135
7.2 An overview of the data warehouse approach  \hspace{1.5cm} 136
8.1 Satisfaction with Dutch democracy by education (n = 1633)  \hspace{1.5cm} 177
8.2 Trust in police and trust in judicial system: scatterplot (n = 28 countries)  \hspace{1.5cm} 183
8.3 Bad to very bad assessed voting and counting stations in 81 elections, 1996–2010  \hspace{1.5cm} 187
8.4 Business bankruptcy per month in the Netherlands (2004–2014)  \hspace{1.5cm} 193
8.5 User-uploaded activity for Business bankruptcy per month in the Netherlands. Web Search activity for ‘wwuikering’ (unemployment benefits) (r = 0.900)  \hspace{1.5cm} 195
8.6 Small-t theory on mechanisms regarding the relationship between the global financial crisis and bankruptcies  \hspace{1.5cm} 196
8.7a Regular ARIMA model (historical bankruptcies data only)  \hspace{1.5cm} 197
8.7b ARIMA model plus normalized query data as an independent variable  \hspace{1.5cm} 197
8.8 Coding Form for Relationships: Stakeholders’ Stakes  \hspace{1.5cm} 204
8.9 Visualization of the personal discussion network among European IP judges belonging to the Venice Forum  \hspace{1.5cm} 212
