The economic characteristics of developing jurisdictions

- Profitability calculation
- Psychological reactions of jurisdictions to follow laws of others
- Public knowledge and education
- Regional agreements (RJCAs)
- Resource shortages
- Risk assessment of markets
- Social and cultural characteristics
- Societal mobility considerations and inclusive development
- Sovereignty issues
- State trade boards and anti-competitive behaviour
- State-imposed restrictions
- State-owned enterprises and illegal cartels
- Technical assistance
- Trade barriers
- Trade benefits
- Trade restraints law
- Transparency and discretion levels
- Wealth distribution inequality
- Welfare considerations
- see also economics in competition law, adapting role of in developing countries

Economic characteristics of developing countries

- Agricultural sector
- Cartel enforcement suggestion
- Competition advocacy suggestion
- Domestic transport infrastructure
- Domestic transport infrastructure
- Entry barriers
- Import competition barriers
- Informal (shadow) economy
- Legal transplant effect
- Market supply modes
- Non-efficiency-based objectives, doubts over
- Personal spending patterns

Economic characteristics, drafting of competition law and learning from experience, merger regulations
- Clarity on legal presumptions, need for
- Conglomerates
- Entrenchment problem
- Inclusive marker growth
- Industrial policy and socio-economic considerations
- Institutions missing or highly deficient
- International firms and NCA credibility
- No intervention policy
- Policy requirements
- Post-merger review to international mergers
- Pre-merger notification system
- Rule simplicity
- Technology transfer
- Voluntary notification system
