

# Acknowledgments

---

This book was partially supported by a grant from the U.S. National Science Foundation Partnerships for International Research and Education (OISE-1243543).

I wish to add special thanks to two former UCI students, Michael Sahimi and Neeta Bijoor, for their contributions to the book. Although neither one was properly a part of the PIRE project from which much of the book's ideas stem, both undertook important research on water conservation projects while at UCI and their analyses and findings are featured in Chapters 6 and 8, respectively.
