

Index

- absorbing state 104
- admissible imputations 223
- Agency (Game 6.2) 92–94
- all-or-nothing offer 184
- anonymous (solutions) 128
- anticoordination game 39, 59–62, 74–6, 83, 160
- arm-wrestling 70, 83
- Arrow impossibility theorem 112, 257
- Arrow, Kenneth 112, 257
- assurance principle 31–2, 38, 41, 125, 159
- assurance value 31, 125, 159
- auction 120
- Aumann, Robert 3, 6, 27, 38, 42–4, 47, 53, 64, 67, 72, 98
- Aumann's Game (Game 5.2) 77

- backward induction 42, 47, 87, 149, 170
- bargaining 32, 37–8, 128–9, 174–8, 241–5, 256–65
- bargaining power 38, 126, 159, 174–7, 182, 191, 192, 200–202, 207–8, 231, 254, 256–65
- basic subgame 87
- Battle of the Sexes (Game 3.2) 39
- Bayesian decision making 42
- Bayesian Nash Equilibrium 111
- behavior strategies 13, 15, 35, 56, 86, 141
- behavioral game theory 45
- biform games 47, 167–75
- Borda, de 112
- bounded rationality 67, 160
- bridge (card game) 22
- burnt bannock 75

- candidate solution 5, 30, 45, 151, 169, 181, 205, 223

- Centipede Game with threat 105
- Centipede Game (Game 6.4) 106
- characteristic function *see* coalition function
- classical game theory 45
- coalition for production and sale 196
- coalition function 6, 18, 20, 30, 38, 43, 125, 148, 159
- coalition structure 6, 22, 169
- coalitional egoism 131
- coalition-proof equilibrium 47, 64
- Coalitions among colleges (Game 8.4) 138
- collective threats 243–4
- commitment 154–63, 208
- commitment, revocable 144
- Complementary Market Entry (Game 5.3) 80
- conditional transfer 144
- Condorcet 112, 257
- Conflict among Three Nations (Game 4.7) 63
- considerable solutions 169–71, 181, 186
- constant-sum game 58
- consumers' cooperatives 30, 137, 187
- consumers' surplus 90, 189, 213
- contestability 147
- contingent claims 80
- contingent fee 92
- contingent strategy 12, 36, 56, 78
- cooperative games 4, 17–22, 40, 125–40, 167
- coordination games 39, 59–62, 74–6
- core 36, 44, 117, 125–8, 131, 132–7, 147–52, 171–5, 204–14
- core assignment algorithm 131, 168, 245
- corner solution 199, 228, 229, 233, 237, 238
- correlated strategy (equilibrium) 39, 45, 70–85, 143

- correlated strategy, game illustrating (Game 9.1) 143
- covariance under strategic equivalence 127, 131
- custom 60, 82
- custom of the sea 76
- decisive voting procedure 113, 115
- deferred acceptance 117
- deviation 150–52, 205, 208, 210, 212, 213, 224
- distributive weights 187, 197
- Dodgson, C.L. 112
- dominance cycles 30, 224, 258
- dominant strategy 40, 50–52, 55
- dominant strategy equilibrium 51–2, 111
- duopoly 40, 96–103
- Duopoly Game (Game 6.6) 96–103
- economic planning agency 82
- efficiency wage theory 176, 242
- efficient allocation of resources within a coalition 183, 187–9
- effort, disutility of, 92, 184–5
- elections 112–5
- Entry Game (Game 2.2) 10
- evolution 42–6, 53, 66–8
- exchange games 132–6, 143–8
- excise tax 193–4
- expenditure function 186
- extended core 207–8
- extensive form 10, 86–108, 141–3
- externality 6, 21, 41, 47, 90, 171, 218
- FCS (feasible coalition structure) games 169–70, 205–7
- Fender-Bender Game, The (Game 4.5) 60–61, 82
- film industry 136
- Final Problem, The (Game 4.3) 57
- firm modeled as cooperative coalition 180–203
- focal equilibrium (Schelling point) 39–40, 61
- folk theorem 44, 97–104
- foresight 37, 224
- forgiving trigger strategy rule 100
- Gibbard-Satterthwaite Theorem 113–5, 161–2
- grand coalition 18
- grim trigger 100
- Harsanyi, John 38, 42, 45
- holdout behavior 168
- Holmes, Sherlock (fictional character) 27, 56–7
- honesty 158–9
- Hurwicz, Leonid 109
- hybrid solution 54
- ideal rationality 157–60, 167, 208
- imbedded coalition 22
- imbedded game 16, 94–6, 109–10, 148–52
- imperfect recall 8, 22–3, 35, 141–63
- implementation theory 109
- imputation 126–7, 181
- incentive compatibility 110, 257
- incredible threat 91
- independence of irrelevant alternatives 113, 129
- individual rationality 128
- industrial organization 40, 121
- information set 11, 35
- inframarginal transfer 186
- interactive decision theory 3, 5, 8, 9, 27
- intermediate case 227–9, 232–3
- Intersection Game, The (Game 4.6) 61–2, 74, 83
- intertemporal inconsistency (in decision-making) 154
- irreversible events 103
- iterated elimination of dominated strategies 33, 55
- Jevons, Stanley 79
- Kuhn, Harold 13, 22–3, 35–6, 141, 148
- labor markets 215–21, 227–32
- law of one price 143, 147, 184
- Lindow man 75
- linear games 261–3
- Luce, R. Duncan 36–8, 72, 128
- majority rule 256–74
- marginal productivity 208–10

- market entry 10, 79, 90–92
 Marx, Karl 120, 149
 Maskin, Eric 5, 43, 79, 101, 109–11, 115, 167
 maximin 29, 31, 33, 35
 McKinsey's Game (Game 3.1) 34
 messaging service model 215–21
 middle ground 167–70
 military draft 73
 military rank 83
 Mill, J.S. 112
 minimum wage 230–31
 mixed strategy 29, 39, 57
 monopoly 42, 143–7, 171, 190–93, 232–5
 monopoly, natural 135
 monopoly price regulation 192–3
 monopoly restriction of output 147
 monopsony 121, 227–32
 Morgenstern, Oskar 12, 45, 56–7
 Myerson, Roger 43, 109

 Nash equilibrium 5, 32, 36–9, 47, 50–69, 86, 111, 141–3
 Nash, John 32, 39, 96
 Nash program 33
 nested game 16, 92
 noncomparable utility 262
 nonconstant-sum games 29
 noncooperative game theory 4, 9–17, 32–6, 167
 non-envious division 110
 non-transferable utility (NTU) 25, 132, 168
 normal form 11–16, 28
 Normandy invasion game (Game 2.6) 23–4, 58
 normative economics 112
 nucleolus 41, 51, 130–33, 178, 241
 null coalition 18

 opportunism 94
 optimism/pessimism 174, 208

 Pareto dominance 51, 66, 81
 Pareto optimality 119, 129–30, 169, 181, 183, 187–9, 262
 Pareto, Vilfredo 112
 Parking Garage Game (Game 5.1) 70–74

 partition 21, 28, 37
 partition function 22, 41, 47
 patent rights 88
 perfect equilibrium 43, 87–9, 104–5, 156–9
 perfect rationality 157–61
 Pigou, A.C. 112
 poison gas 100
 Political economy 148
 Pollution Game, The (Game 4.1) 52, 83
 pragmatism 4, 50, 89–90
 price discrimination 135, 145, 184
 Prisoner's Dilemma 12, 33, 37, 42, 46
 production function 196
 production game 152
 production, games with 135–7
 productivity, idiosyncratic 170
 profit 210–12
 proper subgame 16
 public good 20, 75
 public good production game (Game 2.5) 20, 126–7
 public policy process 4

 Raiffa, Howard 37–8, 72, 128
 rationality constraint 182, 209, 246, 263–5
 rationality constraint, idiosyncratic 263
 rationalizable strategies 44, 62
 reciprocity 106
 reciprocity, third-party 106
 reciprocity, negative 106
 recontracting 126, 204–5
 reduced game 55, 87
 refinement (of a partition) 21
 refinement (of Nash equilibrium) 43, 65–6
 rhetorical interpretation (of cooperative game solutions) 132
 Ricardian corn economy 149–52
 riparian rights 94
 roundabout production 105
 Rousseau, J.-J. 19

 Schelling, Thomas 3, 39, 51, 61, 91, 153
 Selten, Reinhard 14, 41, 43, 45, 48, 88, 141, 153
 Selten's Horse (Game 2.3) 14, 88
 separability, additive 185–7
 Shapley, Lloyd 33, 36, 44, 109

- Shapley-Roth matching algorithm 40, 117
- Shapley value 36, 40, 51, 129–30, 137, 178
- shareholder democracy 265–6
- side payment 18, 30, 71, 126, 142, 184–5, 192
- side payments 18, 23, 71, 126, 142, 184, 192
- Simon, Herbert 66
- simultaneous ascending auction 121
- singleton coalitions 18
- Smith, Adam 27
- social contract 149, 161
- social dilemma 50–53
- social mechanism design 5, 109–24
- sophisticated rationality 158–60
- stability interpretation (of cooperative game solutions) 131
- Stag Hunt, Game 2.4 19
- state transition matrix 101
- state variable 52
- stoplight 74
- strategically equivalent games 127
- strategic form *see* normal form
- strategic investment to deter entry (Game 6.1) 90–91
- strategic voting 112, 257
- strategy-proof election rules 114
- strong equilibrium 64
- subgame 16, 35
- subgame perfect equilibrium 43, 86–8, 90
- subjective probability 58
- successor function 205, 224
- sunspot 79
- superadditivity 6, 20, 22, 31, 43, 125–39
- supergame 38, 98
- surplus 174, 177, 181, 183, 189, 200, 215
- symmetrical election games 260
- Talmud, Babylonian 27
- Terrorist vs. Defender (Game 4.4) 58–9
- tit for tat 44, 99
- tradeable emissions controls 116–7
- transferable utility (TU) 18, 23, 30, 128, 135, 170, 180–94, 260
- transfers, game of 144–6
- trembling hand equilibrium 43, 86
- trigger strategy rule 99–100
- two-by-two games 9, 24
- Two-Person Game (Game 9.2) 156
- types (of agents in mechanism design) 110
- uncertainty 17, 224
- utility 16, 18, 27, 112, 184
- utility, normalization of, 185–7
- utopian 109
- value of a coalition 18
- Vickrey auction 120
- von Neumann and Morgenstern solution set 31–2
- von Neumann, John 12, 23, 27–32, 97, 122
- voting 42, 112–6, 256–74
- water 9, 50, 54–6
- Water Game, The (Game 2.1) 9, 50–51, 53
- weak domination 87
- weakness of will 153
- welfare triangle 146
- zero-sum game 29–30
