Subject index

Agent-based models 83
Balance of payments-constrained
growth theory 72, 161
Balance of trade
in a Kaleckian model 49, 51
in Argentina 66
response to inflation in SFC model
113–116
Buffers
bank accounts 97
inventories 77
Cambridge growth model
by Joan Robinson 27–29
by Nicholas Kaldor 27–28, 30
Capital controls 129–130, 164–166
IMF’s ‘institutional view’ on capital
controls 129
Capital flights 146, 162
Capital gains 95, 106, 108–109, 112
Classical economics 16
Conflicting claims approach to income
distribution 94, 140–141
Consumption decisions 96
Credit conditions via government
orientation 163, 174
Currency convertibility 109
Demand regimes 38–39, 144, 148–149,
169
in Argentina 59, 61–67
in Mexico 155–157
in South Korea 157–158
Development banks 162–163
Diminishing marginal returns
in David Ricardo 17
in neoclassical economics 21
Distribution of Income
and global financial inflows 141, 162
and human capital 23
and social discontent 22–23
and technical conditions 21
hypotheses about its evolution 7–9
in Argentina 56–58
interaction with economic growth 3,
16, 54
trends 5–7
Emergent phenomena 78
Endogenous money 99–100
Error Correction Model 60–61
Exchange rate
pass-through to prices 91–93,
140–141
Exchange rate determination
by monetary policy 49
closures in SFC models 100–101
expectations by heterogeneous
agents 98–99, 106, 117, 145
‘Financial Dutch disease’ 162
Financialization 8–9, 48
in SFC models 79–80
Foreign debt trends 11–12
Foreign private debt
in Chile 135
in East Asia 111
in Kaleckian model 131
in Mexico 149–152
in South Korea 149–151
in the Eurozone 131, 137, 159, 172
recent global trends 132–134,
165–166
Foreign public debt
trends 132, 134
currency risk 96–99, 159–160
Foreign reserves accumulation 164
Global capital flows
after deregulation 64, 72, 136–137
and income distribution 141
Subject index

Foreign Direct Investment 11, 133–134
‘pull’ and ‘push’ factors 144–145
portfolio flows 11, 133, 165
trends 10, 132–135

Growth trends
global 4
in Argentina 56–57
in Mexico 149–151
in South Korea 149–151

Harrod’s growth model 26
Harrodian approach 44

Investment function
impact of interest rates 106
in Argentina 62–64
in Bhaduri–Marglin’s model 36–39, 51, 143
in Rowthorn’s model 34
in Vianello 36

Kalecki’s theory
on political obstacles to growth 29
on profits 28, 103–104
on the business cycle 29
on the effects of lowering wages 29

Kaleckian approach 3, 13

Kaleckian growth model
basic version 31–35
criticisms 35–46
empirical estimations 54–55
origins 32
theoretical extensions 47–49
with endogenous income
distribution 52–56
with exogenous income distribution
49–52

Keynes’s theory
on determinants of effective demand
23–24
on income distribution 24–25
of profits in the Treatise on Money
27

Labour market flexibilization 22
Latin American debt crises 135–136

Mark-up pricing 33, 50, 73, 91, 139
in an open economy 91–93, 140–142

Marx
on falling rate of profits 19, 20
on underconsumption 20

Monetary Theory of Production 74, 76

Mundell–Fleming 106

NAIRU 93
Normal capacity utilization
‘fully adjusted position’ 39–40
susceptible to change 42–43
Normal rate of profit
and the investment rate 36–40
definitions 39–40

Originate-to-distribute 80–81

Paradox of costs 31–32, 34–35
Paradox of thrift 13, 25–27, 31–32, 102

Phillips curve
New Keynesian 79
traditional 93
with a flat segment 93–94, 115
‘Pitfalls approach’ 75

Say’s Law 18

Sectoral budget constraints 77

Secular Stagnation 1, 4
Social Accounting Matrix 74–75

Sovereign risk 96–99

Stability conditions
Harrodian stability 45
Keynesian stability 34, 44–45, 51–52, 73
preservation of stability 45–46, 167–171

Stock-Flow Consistent
approach 74–83
as a methodology 77
core 75
empirical applications 82–83
level of aggregation 78
model 14
theoretical extensions 79–83
ways of solving SFC models 77–78

Supply-led growth
in Adam Smith 17
in David Ricardo 17–19

Taylor Rule 79

Technical progress 94
