List of contributors

Please note that the Chinese contributors use the Eastern order (last name, first name), with the exception of Chi-Han Ai and Kam Wing Chan.

**Chi-Han Ai** is a lecturer at the Department of Economics and Business Management in Nanfang College of Sun Yat-sen University, China. She holds a PhD in the School for Advanced Studies in the Social Sciences, Paris (École des hautes études en sciences sociales, EHESS). Her research interests involve regional economic and industrial economics development in China. During 2010 to 2015, she was research assistant for Professor Gipouloux for UrbaChina, a collaborative project funded under the European Union FP7 programme. From 2013 until now, she has been the blog editor for EurasiaTrajeco, a research project funded by French National Centre for Scientific Research (CNRS) and several other sponsors.

**Luis Balula** is an architect and urban planner, and is currently a researcher at the Institute of Social Sciences at the University of Lisbon, Portugal. He has a broad professional experience as urban and regional planner, project director, researcher and educator. Focused on the intersection of people, place and technology, his research currently explores the opportunities and challenges of the co-evolution of urban areas with information and communication technologies (ICT) in the light of urban futures, strategic planning and spatial theories. As consultant of the private and public sectors, his planning projects in Portugal range from local retrofitting of city cores to the inter-municipal management of environmental sensitive areas. He has taught Urbanism at the Faculty of Architecture of Lisbon and at IGOT-UL (Portugal); and Urban Design at the E.J. Bloustein School of Planning (USA). He holds a degree in Architecture and Planning from the University of Lisbon, an MSc in Urban Affairs from Boston University (USA) and a PhD in Planning and Public Policy from Rutgers University (USA).

**Olivia Bina** is a research fellow at the Institute of Social Sciences at the University of Lisbon, Portugal, and Adjunct Assistant Professor at
GRM–Chinese University of Hong Kong. She is interested in the notion of sustainability and the need to define the key elements of sustainable futures, especially in expanding urban contexts. She has a longstanding commitment to understanding our changing relationship with nature, and how that is at the origin of the many challenges of the twenty-first century. Her work focuses on conceptions of progress, growth and sustainability. She combines this field of inquiry with her longstanding research into environmental governance theory and mechanisms, and has projects exploring the use of foresight and scenarios both in relation to socio-economic questions and in terms of urban futures. She has published widely on these issues and her recent articles explore the changing discourse in sustainable development, the critical issues underlying green growth, limits to growth and notions of scarcity. Olivia has a degree in Political Sciences (Italy), a Master’s in Environment and Development and a PhD in Geography from the University of Cambridge (UK).

Kam Wing Chan is Professor of Geography at the University of Washington, USA. His main research focuses on China’s cities, migration, employment and the household registration system. He is the author of Cities with Invisible Walls: Reinterpreting Urbanization in Post-1949 China, and some 60 articles and book chapters. He has served as a consultant for the World Bank, Asian Development Bank, United Nations, and McKinsey & Co., and worked with the Chinese government on a number of policy projects. His recent commentaries and interviews have appeared in the Wall Street Journal, New York Times, The Economist, South China Morning Post, BBC, CBC Radio, Caixin, Ming Pao and China Daily. Visit his home page at http://faculty.washington.edu/kwchan/.

Chen Hongfeng is a professor and Chief of the Environmental Policy Research Centre at Anhui Academy of Environmental Science Research (AAESR) and a part-time graduate research supervisor at Hefei University of Technology, China. She is a member of the Standing Committee of the 12th People’s Congress of Anhui Province as well as a member of the Specialized Committee of Urban and Rural Construction and Environmental Protection of Anhui People’s Congress. Her research interest is evaluation of environmental planning, policy and regulation. She is the author of Pollution Regulation Efficiency and Transaction Costs (2011).

Du Debin is a professor of Economic Geography at East China Normal University, Dean of the School of Urban and Regional Sciences, Director of the Institute of Innovation and Strategic Studies and the editor in chief of the Journal of World Regional Studies. He was a fellow researcher
of the United Nations Centre for Regional Development in 2001 and a
senior Fulbright visiting scholar at the University of California–Berkeley
from 2003 to 2004. His research focuses primarily on urban and regional
development, especially on R&D activities and China’s urban innova-
tion. His best-known work is The Location Models of R&D Globalization
by MNCs (2001) and Foreign R&D in China: Development, Impact and
Countermeasures (2009); recent major publications include Global Hub of

Miguel Elosua holds a PhD from ECUPL (East China University of
Political Science and Law) and is a PhD candidate at the EHESS,
Paris. Miguel Elosua qualified as a Spanish lawyer in 1996, has an MBA
from HEC, Paris (2004) and an LLM degree in Tax Law from the IE,
Madrid (1997). He has worked as a tax lawyer in the law firms Landwell
and KPMG, and has experience working with NGOs in West Africa and
China. He worked as a research officer for the European Commission
funded project UrbaChina. He has written a weekly article on urbaniza-
tion in China for the UrbaChina blog. He has also written several reports
during the duration of the project. He currently collaborates with the
Property Law Research Institute, ECUPL.

Stephan Feuchtwang is a professor of Anthropology at the London School
of Economics. He has completed a number of research projects in China,
each resulting in a book and other publications on the Transmission of
Grievous Loss, Making Place, Grassroots Charisma, Popular Religion and
Chinese Geomancy.

Françoise Ged, architect, is the director of the Contemporary China’s
Observatory at the Cité d’architecture & du patrimoine (Paris). Her PhD
in 1997 (EHESS, Paris) focused on the Shanghai urban fabric and city
development from 1842 to 1995, and her HDR degree in 2001 focused on
Chinese heritage policies. She was responsible for the bilateral training
cooperation ‘150 Chinese architects, urban and landscape planners in France
the door to numerous exchanges between schools of architecture and pro-
fessionals in the two countries. She is in charge of a major Chinese–French
project on heritage in a Chinese context of accelerated urbanization in
cooperation with the Chinese National Centre of Research on Historical
and Cultural Cities, with the World Heritage Institute for Training and
Research (Asia-Pacific) and Tongji University in Shanghai. She had suc-
cessful cooperation with UNESCO for the World Urban Forum (WUF)
in Nanjing 2008, and participated in selected events for the WUF 2012 in
Napoli and the WUF 2014 in Medellin. She has been an expert member of the ‘Global Award for Sustainable Architecture’ since 2007. Laureate of the ‘Villa Medicis’ in 1988, she was awarded a ‘National order of merit’ (Knight class) in 2008, and became a member of the French Academy of Architecture in 2014.

François Gipouloux (Research Director Emeritus, National Centre for Scientific Research, [CNRS] France) is a specialist in Chinese economics with professional experience in China, Hong Kong and Japan spanning almost 20 years. His research covers the dynamics of urbanization in China and the comparative analysis of economic institutions and business practices in Europe and Asia. He has been the coordinator of the research programme ‘Sustainable Urbanisation in China: Historical and Comparative Perspectives, Mega-trends towards 2050’ (2011–15), which was funded by the European Union. He also directs the International Research Programme ‘Globalisation’s Origins and the Great Divergence: Trading Networks and the Trajectory of Economic Institutions – Europe–Asia, 1500–2000’, financed by CNRS and prestigious European and Asian universities. He is the author of numerous articles on the Chinese economy, including ‘The strategic shift toward domestic market, service enhancement, and urban competitiveness in China’, in Ni Pengfei and Zheng Yongjie (eds), Urban Competitiveness and Innovation (Edward Elgar, 2014) and The Asian Mediterranean: Port Cities and Trading Networks in China, Japan and Southeast Asia 13th–21st Century (Edward Elgar, 2011, also translated into Korean and Chinese). He also edited Gateways to Globalisation: Asia’s International Trading and Finance Hubs (Edward Elgar, 2011).

Gong Wei is a visiting fellow at the School of Law, Queen’s University Belfast. He holds a PhD in Law from Renmin University, China. Before coming to the UK, he was a judge at a high court in China. He is an expert in civil law, especially in property law, tort law, contract law and corporate law. He has worked as a research fellow at Asia Research Centre, the London School of Economics on an EU-FP7 project on urbanization in China. He has published several papers on land issues in the process of urbanization in China.

Sébastien Goulard is a PhD candidate in Economic and Social Development Studies, focusing on regional development policy in China, at the EHESS (School for Advanced Studies in the Social Sciences), Paris. He has started analysing the impact of central local relations on the development of the province of Hainan, adopting a comparative approach with other
non-sovereign islands. Sébastien Goulard has a degree in International Politics (ESE, Nottingham Trent University), a Master’s in International Relations (IRIS) and a Master’s in Social Sciences (EHESS). After completing several internships in NGOs, international organizations and consulting firms in France and Europe, he joined the UrbaChina project.

**Hu Ying** (PhD in Economics, EHESS, Paris) is currently Associate Professor in the School of Economics, Yunnan University, China. She is a specialist in international economics who focuses on regional economic integration, international trade, monetary and fiscal policy, and taxation. She combines empirical evidence and economic theory to research how to improve government policy decisions in areas such as tax policy and trade policy. She was also visiting scholar at the Fondation Maison des Sciences de l’Homme in Paris (2013), and The University of Rennes 2 (2014).

**Huang Li** is an associate professor of Human Geography at East China Normal University and currently a visiting scholar in the University of California at Berkeley. Her research focuses primarily on urban land-use change and spatial studies, metropolitan governance. Her best-known work is her published book *Studies on the Models of Metropolitan Governance* (2003) and her recent major publications include ‘Study of China’s urban grade in the era of consumption – based on the 11 medium and small-sized cities of China’ (2015) and ‘Study of the construction of Wuhan regional financial center in the perspective of financial agglomeration’ (2014). She has also compiled and translated many books. She is the principal researcher and investigator of many externally overseas funded research projects and has accumulated a wealth of project experience. She has also made outstanding achievements in her teaching career. In 2009, Professor Huang was awarded the title of ‘Shanghai Promising Young Teacher’ and also ‘Excellent Teacher in ECNU’. She received the ECNU Best Teacher Award in 2012.

**Athar Hussain** is the Director of the Asia Research Centre at the London School of Economics. He was educated at the universities of Karachi (Pakistan), Dijon (France) and Oxford (UK). He has held visiting appointments at the Department of Economics, MIT, the Fairbank Center for East Asian Research, Harvard University, Zhongshan University Guangzhou, Stockholm University, Namur University and the International Monetary Fund. He has been engaged in research on various aspects of the Chinese economy and society for over 25 years and is proficient in Chinese. He has served as consultant to numerous international organizations and governments on a wide range of policy issues. He was the team leader for an
Asian Development Bank study of urban poverty and labour migration in China. He was one of the coordinators of the UrbaChina research project. He is the author of numerous books and papers, including ‘Pakistani nationalism’, ‘Demographic transition in Asia and its consequences’, ‘Chinese economic reforms from a comparative perspective’ and ‘Social welfare in China in the context of three transitions’. Books authored or edited by him include The Chinese Economic Reforms, Transforming China’s Economy and Political Economy of Hunger.

Li Shantong is a senior research fellow and former Director General of the Department of Development Strategy and Regional Economy of Development Research Centre (DRC) of the State Council (People’s Republic of China). She was a member of the National Committee of CPPCC (Chinese People’s Political Consultative Conference). She holds professorships at both Peking University and Tsinghua University. As vice president of the Academic Committee of the China Development Research Foundation, Professor Li played an integral role in several national research projects for China’s economic development. She also participated in joint development projects with the World Bank, UNDP, UNIDO, OECD and the ADB. She has done systematic research on issues concerning China’s medium- and long-term development, with a particular focus on regional economic and social development. Among many of her accomplishments Professor Li contributes to the ‘Development Strategy and Policies for 13th Five-Year Plan and towards 2020’. She has formed an applicable CGE model, called the DRC-CGE model of China, and has also trained a team of scholars working in this field. This model has been applied in many research projects both domestically and abroad. She won the Fudan Management Excellence Award in 2014.

Paula Morais is presently the Module Coordinator in Urban Design: MRes Interdisciplinary UD, and a tutor in Urban Design and International Planning at the Bartlett School of Planning, UCL; previously she was a research officer at the London School of Economics (LSE) for the EU-FP7 UrbaChina research project looking at sustainable urbanization in China. She is completing a PhD in Planning Studies investigating urban identity and the relation between open public space, identity and change in Macau, sponsored by the Science and Technology Foundation, FCT-Portugal at the Bartlett School of Planning (UCL), where she also co-founded and coordinated the China Planning Research Group (CPRG). Trained originally as an architect by FAUP at the University of Porto, Paula worked in several architecture practices such as Santiago Calatrava
and Frederico Valsassina Arquitectos Lda, and had her own practice with partner Bernardo Falcão de Azevedo.

Ni Pengfei is Director of the Centre for City and Competitiveness, CASS; assistant to the Director of the National Academy of Economic Strategy, CASS; and Director of the Urban and Real Estate Economy Research Unit of the National Academy of Economic Strategy, CASS. He holds a PhD in Economics, and is a research fellow and doctoral supervisor. He was hired as ‘Reform and Development of SMEs’ project assessment expert by UNDP. He is Adjunct Professor in the Institute of Public Administration, Huazhong University of Science and Technology, Beijing Normal University Institute of Resources and Economic Management, and Chinese University of Hong Kong. He also acts as vice secretary in the Chinese Society for Urban Studies, the Chinese Urban Development Academy and the China Society of Urban Economy. Ni Pengfei has been an economic consultant for the city government of Chengdu, Xian and Dongguan, among others. His magnum opus, the Chinese Urban Competitiveness Report, received the Sun Yefang Economy Prize in 2005. He has published more than ten academic books and dozens of papers on urban studies in the Journal of International Affairs, Social Sciences and Economic Research Journal in China at home and abroad.

Dwight H. Perkins is Harold Hitchings Burbank Professor of Political Economy, Emeritus, Harvard University. Previous positions at Harvard include Associate Director of the East Asian (now Fairbank) Centre, Chairman of the Department of Economics, Director of the Harvard Institute for International Development (HIID) and Director of the Harvard Asia Center. HIID was Harvard University’s main vehicle for providing technical assistance to developing and transition countries as well as a centre for research. Dwight Perkins has authored, co-authored or edited 24 books and over 100 articles on economic history and economic development with special reference to the economies of China, Korea, Vietnam and the other economies of East and Southeast Asia. His most recent publications include East Asian Development: Foundations and Strategies (2013). He has served as an advisor or consultant on economic policy and reform to the governments of South Korea, China, Malaysia, Vietnam, Indonesia and Papua New Guinea, and to the Ford Foundation and The World Bank.

Oriane Pillet was an intern for the UrbaChina research project at the CNRS, UMR Chine, Corée, Japan. Her research has focused on urban rehabilitation and industrial heritage. After she obtained a double degree
in Geography and Law at Paris 1 Panthéon–Sorbonne University, she followed a Master’s in Urban Local Development at IEDES (Institut des Etudes de Développement Economique et Social) at Paris 1 and a Master's in International Development at Utrecht University (Netherlands). She is currently working in Beijing as research assistant and editor for Sinapolis, a think-tank focused on transformation of Chinese cities.

Pu Yongjian was born in 1961. He is currently a professor and PhD supervisor in the School of Economics and Business Administration of Chongqing University. He is also Deputy Director of the Institute for Sustainable Development of Chongqing University. In addition, he served as senior advisor on tourism economics for Chongqing municipal city; president of the Chongqing Information Economics Society; and Commentator of the American Mathematical Society. His professional interests focus on economics and finance, game theory, energy economics, regional economics, development economics and tourism management. Pu Yongjian has authored more than 200 papers and published more than 20 monographs. He has conducted four research projects sponsored by the Natural Science Foundation, two research projects sponsored by the National Social Science Foundation and over 20 ministerial- and provincial-level funded projects. He was recently honoured with the Distinguished Academic Staff Award by Chongqing municipal city and received 200,000 RMB research funding annually for four years.

Shao Yong is Professor in the College of Architecture and Urban Planning at Tongji University (China) and Executive Director for the World Heritage Institute of Training & Research for the Asia-Pacific Region (Shanghai). She is an expert member of ICOMOS-ISCEAH and ICOMOS-CIAV, and of the National Committee of Historical and Cultural Cities Conservation of China. From 1990 Dr Shao has been working for the conservation of historical cities, towns and villages, and world cultural heritage sites in China. Her project ‘The Water Town Conservation’ won UNESCO’s World Heritage Conservation Distinction Award of the Asia-Pacific region in 2003, and the ‘Community-based Conservation Project of World Heritage Lijiang’ won the Merit Award in 2007. Dr Shao joined several international conservation projects as an expert, including Project Asia URBS of the EU, the Sino-French cooperation of heritage conservation, the UNESCO Chair of Environment and Landscape Design, the UN-Habitat programme for ‘Historic Quarter for All’ and WHEAP of UNESCO, among others.

Tan Jing is now a lecturer at the School of Economics of Shanghai University. She worked as a postdoctoral research fellow of the School
of Economics at Fudan University from 2012 to 2015. She got her PhD degree in Economics from the School of Social Development and Public Policy at Fudan University in 2012. She has a long and lasting interest in population, labour and related policy research, and her publications and research mainly focus on the fields of urbanization, migration, labour market development, social security reform and the hukou reform system in China. She has had papers published in some Chinese top journals, such as Economic Research Journal and Journal of Financial Research.

Wang Jingya is a senior engineer in the Anhui Academy of Environmental Science Research (AAESR). Her work focuses on provincial-level environmental planning and policy research. She completed the evaluation of ‘The 11th Environmental Protection Plan in Anhui’ and was a member of the editorial team compiling ‘The 12th Environmental Protection Plan in Anhui’ and ‘The 12th Green Economy Plan in Anhui’. Her current work involves pollution abatement policy making and enforcement at provincial level.

Xiong Ailun received his Master’s degree from the Henry Business School of Reading University, UK, in 2010. He is currently holding a PhD position in technical economics and management at the School of Economics and Business Administration of Chongqing University. He has been awarded a scholarship programme launched by China Scholarship Council and visited the School of Architecture and Built Environment, KTH Royal Institute of Technology, Stockholm from 2013 to 2014. His professional interests focus on social capital, urbanization and civic engagement. He has authored several papers on social capital and development, social network and job searching, and online civic engagement.

Xu Wei is Professor and Chair at the Department of Geography, University of Lethbridge, Alberta, Canada. He is also a Distinguished Zijiang Visiting Chair Professor at the Centre for Modern Chinese City Studies, East China Normal University, and an Adjunct Professor at Fujian Normal University, Fuzhou, China. Dr Xu received his BSc (1982) and MA (1985) from East China Normal University in Shanghai where he was trained as an urban geographer. He was awarded MA and PhD in Geography at the University of Guelph in Canada in 1993 and 1998. As a China study specialist, Dr Xu has conducted numerous researches on Chinese urban and regional development. Dr Xu is also a trained specialist in the field of environmental and resource management. His research has been funded by CIDA, IDRC, SSHRC, the Chinese Ministry of Education, TECTERRA, Alberta Innovates and Environment Canada. His current
research interests include urban and regional development, Chinese labour market dynamics, land-use change, impact of globalization on cities, water resource management, and relations between development and environment. Dr Xu has served as Chair of the China Geography Study Group of the Association of American Geographers.

Yuan Zhigang obtained his PhD in Economics from the Ecole des Hautes Etudes en Sciences Sociales in 1993. In 2006 and 2007, he was honoured as the Changjiang Scholar and National Outstanding Teacher by the Ministry of Education of the PRC respectively. He is director of the Employment and Social Security Research Centre at Fudan University, vice president of the Shanghai Economist Society, consultant of Fujian Provincial Government, member of the ‘Comité International d’évaluation Scientifique de la Fondation MSH’ in France, and editorial board member of numerous core academic journals in China. Professor Yuan's research interests are macroeconomic issues covering employment, social security and social insurance, household consumption, financial reform and real estate. He has published over 150 papers and 20 books. Furthermore, he has been in charge of various national research projects and received over 20 provincial and national awards.

Zhang Hui is a lecturer at the Institute of Anthropology, Renmin University of China and a researcher for WP5 in the UrbaChina project. Graduated from the London School of Economics, her PhD research was on envy and windfall wealth, and she has published papers on emotion, ethics, mining disputes and urbanization. Her current projects include turning her PhD thesis into a book and a co-edited book on anxiety, fear and risk.
