

Tables

1.1	British Columbia carbon tax rates for selected fuels as of 1 July 2008 and as of 1 July 2012, following four years of successive increases	5
1.2	Per cent changes in per capita consumption of petroleum products (gasoline, diesel, fuel oil and propane) in British Columbia and the rest of Canada between 1 July 2007 and 30 June 2013	7
5.1	Free allocation and verified emissions in the EU ETS, 2005–2013	68
8.1	Ex ante estimation of demand shifts and GHG reduction potentials in million tonnes by specific VAT rate changes in selected product groups	117
9.1	Overview of scenarios	130
9.2	Total final energy demand, 2020, 2030	137
10.1	Milan Ecopass system: class vehicle category and charges	144
10.2	Road charges as reported by AMAT	146
10.3	Composition of total traffic entering Ecopass Area in 2011	147
10.4	Urban road pricing comparison: London, Stockholm and Milan	153
11.1	Excise duty rates on petrol, diesel and VAT in the analyzed countries	163
11.2	Estimated elasticities	166
11.3	Simulation results	168
12.1	Preliminary list of the criteria for climate change policy evaluation	182
12.2	Established evaluation criteria	183
14.1	Revenue from state energy taxes in absolute terms and relative to total energy taxes and total state tax, 2013 (provisional data)	212
14.2	Maximum tax rates of regional section of excise duties on mineral oils	213
