

# Figures

---

1.1	EU imports from Russia as a percentage of total imports of natural gas, 2012	31
1.2	A growing demand for energy in the world	36
2.1	Crude oil price 2006–2008 (Brent) (dollars per barrel)	57
2.2	Amount of primary energy consumption by SOURCE (2013) (figure expressed as a percentage)	61
2.3	Major European gas pipelines	76
2.4	Spaghetti bowl	87
2.5	Surface trade between US and NAFTA (from 1995 to 2011)	93
2.6	Proven crude oil reserves of Canada, Mexico and the USA (1992) (in million barrels)	94
2.7	Production of primary energy in the European Union (2013)	99
2.8	Origin of European Union natural gas imports (2013) (figures expressed as a percentage)	101
2.9	The Trans-ASEAN Gas Pipeline	111
2.10	EU-28: regasification capacity of large-scale terminals (figures expressed in billion m <sup>3</sup> /year)	142
4.1	Map of the legal status of shale gas extraction in Europe	225
4.2	Supply shock resulting from additional energy resources output	230
5.1	Global electricity generation by source (%)	271
6.1	Turkish Stream and the abandoned South Stream projects	356
6.2	Eurasian Economic Union's geographical area (in km <sup>2</sup> )	358
6.3	Eurasian Economic Union's population (in millions of inhabitants)	359
6.4	EU's main origin of primary energy imports (2012)	364
6.5	Russia's oil and natural gas production by company (2012)	366
