Nick Bailey is Professor of Urban Regeneration in the Faculty of Architecture and the Built Environment at the University of Westminster. He has many years' experience of teaching urban planning, housing and regeneration at Master's level and carrying out a variety of research projects. His particular research interests include urban governance, neighbourhood planning and management and the role of social and community enterprise in urban regeneration, and he has published widely on these subjects in academic journals, books and monographs. Nick is a board member of a community development trust in London and advises several groups on neighbourhood planning.

Marianne de Beer is a PhD candidate in Economic Geography at the Faculty of Geosciences, Utrecht University, the Netherlands. Her research mainly focuses on the business support networks of entrepreneurs located in residential neighbourhoods and changes in these networks over the firm life course. The business support investigated involves help and advice on business and practical matters, emotional support as well as inter-firm cooperation. Another part of her research looks into the extent to which neighbourhood entrepreneurs are involved in (local) social value creation.

Ignasi Capdevila is an Associate Professor at PSB Paris School of Business in France. He obtained his PhD at HEC Montréal where he is a member of Mosaic, the Creativity & Innovation Hub. His research interests include localized knowledge creation and transfer, knowledge communities, creativity and innovation management in organizations and cities. Currently, his main research focus is to study the knowledge, innovation and collaboration dynamics in open collaborative spaces (such as Fab Labs, maker spaces, hackerspaces or co-working spaces) in Paris and Barcelona.

Evan Casper-Futterman is a fourth generation New Yorker born in the Bronx and raised in Manhattan. He earned a Master's degree in Urban and Regional Planning from the University of New Orleans in 2011, and was a White House Intern in the spring of 2012 in the Domestic Policy Council's Office of Urban Affairs. In the summer of 2013 he was a Research Fellow for the US Federation of Worker Cooperatives. He is currently a Doctoral candidate (ABD) at the Edward J. Bloustein School

of Planning and Public Policy at Rutgers University, studying economic democracy and policy development.

James J. Chrisman is Julia Bennett Rouse Professor of Management, and Department Head of Management and Information Systems at Mississippi State University, USA. He is also Senior Research Fellow, Centre for Entrepreneurship and Family Enterprise at the University of Alberta in Canada. A graduate of Illinois Central College, Western Illinois University, Bradley University and the University of Georgia, Dr Chrisman has published numerous articles, book chapters and edited books with highly ranked journals and publishers. He is Senior Editor at *Entrepreneurship Theory and Practice*. His special interest in family business is reflected in his Directorship of the Center of Family Enterprise Research at Mississippi State University.

James DeFilippis is a native New Yorker and Associate Professor at the Edward J. Bloustein School of Planning and Public Policy at Rutgers University. His research focuses on the politics and economics of cities and communities. He is particularly interested in the processes of social change, and questions of power and justice in cities. He strives to make connections, linking disciplines and connecting academic theory and grounded political practice, extending his work beyond the academy and into the practice of political work and policy analysis.

Maarten van Ham is Professor of Urban Renewal at the Department OTB – Research for the Built Environment, Delft University of Technology. He is a population geographer with a background in economic and urban geography. He is also Professor of Geography at the University of St Andrews and a Research Fellow at IZA Institute of Labor Economics. In 2014, he was awarded a 2 million euro ERC Consolidator Grant for a 5-year research project on neighbourhood effects (DEPRIVEDHOODS). He has more than 100 publications (including 60 peer-reviewed papers) and has research projects in the UK, the Netherlands, Germany, Sweden, Lithuania and Estonia.

Reinout Kleinhans is an Associate Professor of Urban Regeneration at Delft University of Technology, Faculty of Architecture and the Built Environment. He has expertise in the fields of urban regeneration, social capital, citizens' self-organization (online/offline), community enterprise, and collective efficacy. He holds a PhD in Urban Geography and is an experienced (international) project leader. He has published more than 26 peer-reviewed journal articles, 15 book chapters and has co-edited several books. He is a board member of the Knowledge Centre Liveable Neighbourhoods (Kenniswerkplaats Leefbare Wijken) in Rotterdam.

Jenny Lendrum is a PhD candidate in the Department of Sociology at Wayne State University, Detroit, MI, USA. Her research interests include community and urban sociology, labour and labour movements (with a particular focus on women's work in public and private spheres), body and embodiment (with a special focus on women in sport) and urban spaces. She is currently conducting ethnographic research in Detroit, exploring a flourishing informal economy. Her earlier work examines the motivations of women who participate in the sport of marathon running. She herself is a marathon runner.

Colin Mason is Professor of Entrepreneurship in the Adam Smith Business School, University of Glasgow. His research and teaching are in the area of entrepreneurship and regional development. His specific research interest is in entrepreneurial finance. He has written extensively on business angel investing and has been closely involved with government and private sector initiatives to promote business angel investment, both in the UK and elsewhere. He was joint winner of the ESRC's 2015 Outstanding Impact in Business award for his research with Prof. Richard Harrison on business angels. He is the founding editor of the journal *Venture Capital: An International Journal of Entrepreneurial Finance* (published by Taylor and Francis Ltd).

Ana María Peredo is Professor in the School of Environmental Studies, former Director of the Centre for Co-operative and Community-Based Economy and Professor of Sustainability and Professor of Entrepreneurship in the Business School at the University of Victoria, Canada. Drawing on her background in social and cultural anthropology and business, and experience as a journalist in her native Peru, Dr Peredo's research focuses on the role of collective, cooperative enterprise in fostering sustainable communities, especially among impoverished peoples. She has published widely in highly ranked, scholarly management journals and authoritative anthologies, presented at numerous national and international conferences and won a number of teaching, research and knowledge mobilization awards.

Darja Reuschke is Associate Professor in the Department of Geography and Environment at the University of Southampton, UK. Her research focuses on the economic, social and spatial dimensions of microenterprise, home-based business and self-employment. Her expertise is in longitudinal modelling and secondary data analysis. With an ERC Starting Grant she is currently investigating how home-based self-employment and businesses are currently reshaping societies and space and are simultaneously shaped by the economy, technology, society, cities, neighbourhoods and housing.

Emiel Rijshouwer studied both industrial design engineering and sociology. At the Erasmus University Rotterdam he is involved in research concerning the organization of self-organization, both online and offline. Self-organization is fundamentally a spontaneous phenomenon, without central coordination or oversight. Inspired by the fact that self-organization currently is a political ideal he examines the production of participation; that is, the strategies and practices of those encouraging and facilitating volunteers and civil society members to act as providers of collective goods and services.

Veronique Schutjens is Associate Professor of Economic Geography at the Faculty of Geosciences, University of Utrecht, the Netherlands. Her research activities encompass regional and national variations in activity and attitude of (migrant) entrepreneurs; new firm growth, survival and performance; development of (spatial) strategies during the (early) firm life course; formal and informal entrepreneurial and firm networks; and the neighbourhood economy. A central research topic is the interdependence between local firms and their entrepreneurs, and the neighbourhood. She has published in international journals in economic geography, urban geography, planning, regional science and economics.

Erik Stam is Full Professor at the Utrecht University School of Economics, where he holds the chair of Strategy, Organization and Entrepreneurship. He is co-founder and Academic Director of the Utrecht Center for Entrepreneurship. He has held positions at Erasmus University Rotterdam, the University of Cambridge, the Max Planck Institute of Economics (Jena, Germany) and the Netherlands Scientific Council for Government Policy (WRR). He is editor of *Small Business Economics*. His expertise focuses on how socio-economic contexts (at the societal and organizational level) affect new value creation by individuals, and the consequences of this entrepreneurship for the performance of firms and society.

Sarah Swider is Associate Professor of Sociology at Wayne State University. Her research focuses on informal and precarious workers. She examines the employment relations that define informal work and looks at how these workers are reshaping workplaces and urban spaces. Her publications include *Building China: Informal Work and the New Precariat* (Ithaca (United States): Cornell University Press, 2015) and 'Reshaping China's Urban Citizenship: Street Vendors, Chengguan and Struggles over the Right to the City' (*Critical Sociology*, April, 2014).

Stephen Syrett is Professor of Local Economic Development and Director of Research at Middlesex University Business School. He specializes in

issues of urban and regional economic development, governance and policy and the study of ethnic minority, home-based and social enterprises, microbusinesses and the role of enterprise in regenerating deprived areas. He has published widely on these topics including a number of books and many journal articles and reports. He has worked extensively with national, regional and local government bodies in the UK and internationally, as well as with a wide range of voluntary and community sector and private sector organizations.

Justus Uitermark is Associate Professor of Sociology at the University of Amsterdam. He has published books and articles on a variety of subjects, including gentrification, activism, and urban governance. His current research deals with the promotion of self-organization in policy and social movements.

David Varady is a Professor of Planning at the School of Planning, University of Cincinnati (Ohio, US). He is also a Visiting Professor at Delft University of Technology, Faculty of Architecture and the Built Environment. He is a recognized expert on the topics of housing vouchers, segregation, residential mobility, neighbourhood choice, public housing revitalization, forced relocation, spillover effects, and international comparison of urban regeneration policies. He is a member of the editorial board of several academic journals and serves as a book review editor for the *Journal of Urban Affairs*. He has published more than 70 papers in academic journals and has (co-)edited a large number of books.

Beate Volker is Professor of Sociology at the University of Amsterdam. She is Director of the programme group 'Institutions, Inequalities and Life Courses' and of the Bachelor's programme 'Interdisciplinary Social Sciences'. Her research focuses on networks and inequalities through time, the influence of social settings, such as neighbourhood, and organizations on social relationships and on returns of social capital in different domains of one's life. She has published among others in *Social Networks*, *Social Forces*, *Urban Studies*, *Social Science & Medicine* and *PLOS ONE*. She is a member of the editorial board of *Social Networks* and of the Royal Holland Society of Sciences and Humanities (KHMW).

Vareska van de Vrande is Full Professor of Collaborative Innovation and Business Venturing at the Rotterdam School of Management (Erasmus University Rotterdam). She has held positions at Ecole Polytechnique Fédérale de Lausanne and the Eindhoven University of Technology. Her expertise focuses on the areas of corporate venturing and collaborative innovation. She has published articles in leading academic journals, including the *Strategic Management Journal*, the *Journal of Product*

Innovation Management, IEEE Transactions on Engineering Management and the *Journal of Business Venturing*.

Colin Williams is Professor of Public Policy at the University of Sheffield. His broad research interests are in re-theorizing the nature of economic development and investigating the implications for public policy. Spatially, his interests range across the full spectrum from local and regional economic development in the UK through to the restructuring of Western economies, post-socialist societies and the third (majority) world. He has a particular research interest in studying the magnitude and character of the informal economy and evaluating different public policy approaches and initiatives for tackling this sphere.

Nick Williams is an Associate Professor of Enterprise at the University of Leeds. His research focuses on entrepreneurship and economic development, with a particular focus on entrepreneurial activity in less prosperous regions and deprived areas within countries, and the role in which policy can play in improving entrepreneurial outcomes in such localities. His research also focuses on the role of institutions in fostering entrepreneurship, and has conducted institutional research in transition and post-conflict economies.
