

# Acknowledgments

---

First, I must thank the scholars of the Political Economy Research Institute. Their engagement of my early interests in Europe's financial development, and subsequent economic events, provided the perfect springboard for beginning and accomplishing this book.

I am also grateful to my colleagues in the Economics Department at Bentley University, Boston. The department is a wonderful environment in which to perform research – my coworkers have made many helpful suggestions, and my work is the better for it. My students' sense of inquiry has kept me on my toes, and has helped improve my explanation skills immeasurably.

Thanks, also, to those who have attended my presentations at conferences discussing various chapters herein. Your questions have made me clarify my positions to the benefit of all, and your comments have enriched my writing process.

A very large thank you to Edward Elgar Publishing – you have been a wonderful group to work with! I've appreciated your interest in the topic, your words of encouragement, and your patience in waiting through the revision process.

Finally, my greatest appreciation is for my friends and family. You know who you are.
