

# Figures

---

2.1	Scatter-Plot: What is the Relationship between $y$ and $x$ ?	15
2.2	Scatter-Plot with 95% Confidence Interval Super-Imposed	16
2.3	Regression without the Independence Assumption	19
2.4	Estimated Slope as a Function of Angle of Residual ( $\psi = 0.15$ )	21
2.5	Scatter-Plot with $\psi = 1.0$	23
2.6	Estimated Slope as a Function of Angle of Residual ( $\psi = 1.0$ )	23
2.7	Scatter-Plot with $\psi = 5.0$	24
2.8	Estimated Slope as a Function of Angle of Residual ( $\psi = 5.0$ )	24
3.1	Friedman's Argument in a Diagram	30
3.2	Instrumental Variables and the Data Generation Process	38
10.1	Cumulative Number of Econometric Innovations, 1895–2016	108
10.2	A Simple Model of Econometrics-Centred Research	112
17.1	Innovation: A Complex Multidisciplinary Hybrid	192
18.1	Policy for Standards: A Complex Practitioner Hybrid	202
18.2	Standards, Intermediate Effects and Macroeconomic Effects	205
A.1	Regression with the Independence Assumption	224
A.2	Regression without the Independence Assumption	224
