Introduction 1

PART I FROM ECONOMIC TO ENVIRONMENTAL OBJECTIVES: LOOKING BACK AT THE RATIONALE OF TRADITIONAL BTAS AND LOOKING AHEAD TO NEW PARADIGMS

1 History and theoretical foundations of traditional BTAs 9
  1.1 BTAs’ economic foundation 10
    1.1.1 BTAs’ historical development in light of the history of tariffs 10
    1.1.2 The origin of BTAs’ economic rationale 12
  1.2 BTAs’ political history 18
    1.2.1 First BTAs 18
    1.2.2 International fora on BTAs: the OECD and GATT reports on BTAs 19
    1.2.3 National and regional views on BTAs 34
  1.3 BTAs’ main theoretical foundations 44
  1.4 Interim conclusions 47

2 History and theoretical foundations of environmental BTAs 48
  2.1 Environmental BTAs’ economic foundation 49
  2.2 Political history of environmental BTAs 54
    2.2.1 International fora on environmental BTAs: the OECD and the GATT/WTO 54
    2.2.2 National and regional views on environmental BTAs 70
  2.3 Environmental BTAs’ main theoretical foundations 85
    2.3.1 Ricardo’s theory revised: the revised theory of comparative advantage 86
    2.3.2 Revised theory of the absolute advantage 88
Environmental border tax adjustments and international trade law

2.3.3 Theory of the legitimate absolute advantage 89
2.3.4 Interactions between traditional and environmental BTAs’ theoretical foundations: legal impact 96
2.4 Interim conclusions 98

PART II FROM TRADITIONAL CONSUMPTION TAXES TO INNOVATIVE ENVIRONMENTAL BTAs: AN ANALYSIS OF THEIR TAX DESIGN

3 Tax design of traditional BTAs 101
  3.1 General characteristics 101
    3.1.1 BTAs and the concept of ‘border’ 101
    3.1.2 BTAs and the concept of ‘tax’ 102
    3.1.3 BTAs and the concept of ‘adjustment’ 102
    3.1.4 BTAs and goods 103
  3.2 Illustration: traditional BTAs in practice 106
    3.2.1 Practices in the 1960s: findings of the OECD and GATT Reports 106
    3.2.2 Current practices: the examples of EU VAT and excise duty systems and of US retail sales taxes 107
  3.3 Interim conclusions 116

4 Tax design of environmental BTAs 119
  4.1 General characteristics 119
    4.1.1 Environmental BTAs and the concept of ‘border’ 119
    4.1.2 Environmental BTAs and the concept of ‘tax’ 120
    4.1.3 Environmental BTAs and the concept of ‘adjustment’ 122
    4.1.4 Environmental BTAs and goods 124
  4.2 Illustration: Environmental BTAs in practice 125
    4.2.1 Excise duty-based models 125
    4.2.2 VAT-based models 137
    4.2.3 Models based on the retail sales tax 147
    4.2.4 Other models – environmental tax on producers 148
  4.3 Common issues of tax design 149
    4.3.1 Valuation – environmental proxies 149
    4.3.2 Risk of abuse 151
    4.3.3 Allocation of revenue 155
  4.4 Interim conclusions 161
PART III FROM OLD LEGAL DEBATES TO BRAND NEW
LEGAL ISSUES: AN ASSESSMENT OF THE
COMPATIBILITY OF TRADITIONAL AND
ENVIRONMENTAL BTAs UNDER WTO LAW
(AND BEYOND)

5 Legal framework of traditional BTAs 165
  5.1 BTAs’ main legal grounds 166
     5.1.1 General GATT provisions and BTAs 166
     5.1.2 WTO law: specific rules surrounding BTAs 167
  5.2 Conditions for the adoption of BTAs on imports and
     exports 180
     5.2.1 Taxes concerned – conceptual framing of BTAs 181
     5.2.2 BTAs on imports: the National Treatment (NT)
         principle 206
  5.3 Interim conclusions 222

6 Legal framework of environmental BTAs 224
  6.1 Environmental BTAs under WTO law surrounding
      traditional BTAs 225
     6.1.1 Eligible taxes 225
     6.1.2 National Treatment principle 235
     6.1.3 MFN principle (GATT Article I) 238
  6.2 Environmental BTAs under other (WTO and non-WTO)
      relevant legal provisions 240
     6.2.1 Other WTO relevant legal provisions:
         GATT Article XX 241
     6.2.2 Other non-WTO relevant legal provisions 257
  6.3 Interim conclusions 280

Conclusion 282
